SUMMARY MANPOWER INDICATORS

FOR

SAN FRANCISCO, DISTRICT 6
SUBDISTRICTS A, B, C, D, E, F, G
WESTERN SAN FRANCISCO

NOTE -- AN ASTERISK (*) FOLLOWING A DATA ITEM INDICATES A DISCLOSURE SUPPRESSION. THE BUREAU OF THE CENSUS DID NOT RELEASE DATA WHEN TOO FEW INDIVIDUALS WERE COUNTED IN A PARTICULAR CATEGORY IN ORDER TO PREVENT DISCLOSURE OF INFORMATION ABOUT INDIVIDUALS. THE SUPPRESSED DATA IS COUNTED AS ZERO WHEN USED IN CALCULATIONS. THE ASTERISK WILL APPEAR WHEN A SUPPRESSION OCCURRED IN ANY NUMBER USED IN THE CALCULATION OF THF ITEM. FOR EXAMPLE, WHERE A SUPPRESSION OCCURRED IN A TOTAL, ALL PERCENTAGES CALCULATED FROM THAT TOTAL WILL SHOW THE SUPPRESSION ASTERISK.

SPANISH AMERICAN -- IN 42 STATES AND DISTRICT OF COLUMBIA, THIS POPULATION IS IDENTIFIED AS -PERSONS OF SPANISH LANGUAGE-; IN FIVE SOUTHWESTERN STATES, AS -PERSONS OF SPANISH LANGUAGE OR SPANISH SURNAME-; AND IN THE MIDDLE ATLANTIC STATES, AS -PERSONS OF PUERTO RICAN BIRTH OR PARENTAGE-.

SPANISH AMERICANS ARE ALSO COUNTED IN THE RACIAL CATEGORIES AS WHITE, BLACK OR OTHER RACES.

The availability of data from the 1970 Census of Population on computer tapes provides Census users with unique opportunities to tailor output to individual requirements and to execute the statistical operations necessary to sharpen the analysis of economic and social conditions in the United States.

The Manpower Administration has taken full advantage of the opportunities presented by the 1970 Census and of computer technology by compiling a series of reports based on information contained in the second and fourth count summary tapes. These reports, which include much unpublished data, were prepared cooperatively by Federal, State, and local research personnel. They are specially geared to the informational needs of manpower program managers and staff specialists, manpower planners, and research workers in human resource programs. The use of computers permitted the creation of manpower profiles for administrative areas; thus, in addition to the usual geography--States, counties, cities, etc.--the reports in this series also include information on Department of Labor's administrative areas and those of State Employment Security agencies and other associated organizations.

The major reports prepared from the second and fourth count summary tapes are:

1. Summary Manpower Indicators
2. Detailed Manpower Indicators
3. Inter-Area Manpower Comparisons
4. Manpower Indicator Atlas

The reports were planned and written in the Manpower Administration, Region IX Data Systems and Reports Division, Walter Postle, Chief, in cooperation with staff of the Employment Security research and analysis staffs in Arizona, California, Hawaii, and Nevada.

Special thanks are due to Susan Holland, Economist in the Region IX-X Office of the Bureau of Labor Statistics, who prepared the bulk of the Summary Manpower Indicators report; to Bruce Bargmeyer, Manpower Development Specialist in the Region IX Data Systems and Reports Division, who worked tirelessly in bringing this project to completion; to William Grannell, Research Analyst in the California Department of Human Resources Development who made substantial contributions to the inter-area comparison report; to Susan Wisler, Manpower Economist in the Nevada Employment Security Department; to Richard Froncek of the Arizona Employment Security Commission and Fred Pang, Research Statistician in the Hawaii Department of Labor and Industrial Relations. Out thanks are also due to Carl Quong and his expert staff in the Applications Programming Group of the Lawrence Berkeley Laboratory, University of California, who prepared the computer programs for this project.

MANPOWER PROFILE

SAN FRANCISCO, DISTRICT 6
SUBDISTRICTS A, B, C, D, E, F
WESTERN SAN FRANCISCO

RACIAL AND ETHNIC CHARACTERISTICS

THE TOTAL POPULATION OF THE AREA IN APRIL 1970 WAS 288,895* WITH A RACIAL COMPOSITION OF WHITES, 252,734* (87.5* PERCENT); BLACKS, 6,678* (2.3* PERCENT); OTHER RACES, 29,483* (10.2* PERCENT). THE SPANISH AMERICAN ETHNIC GROUP (ALSO COUNTED PRIMARILY IN THE WHITE RACE, BUT INCLUDES SOME BLACKS AND OTHER RACES) ACCOUNTED FOR 34,194* (11.8* PERCENT OF THE POPULATION). PERSONS OF FOREIGN STOCK MADE UP 137,302 (47.5* PERCENT OF THE TOTAL POPULATION).

AGE

ONE HALF OF THE MALE WHITE POPULATION WAS BELOW 37.9* YEARS OLD, COMPARED WITH 27.0* YEARS FOR MALE BLACKS, 27.2* YEARS FOR MALES IN OTHER RACES, AND 27.4* YEARS FOR MALE SPANISH-AMERICANS. THE RESPECTIVE MEDIAN AGES FOR FEMALES WERE--WHITE 44.3* YEARS, BLACK 26.8* YEARS, OTHER RACES 27.9* YEARS AND SPANISH-AMERICANS 28.9* YEARS. SOME 190,537* (66.0* PERCENT OF THE TOTAL POPULATION) WERE IN THE PRIME WORKING AGE GROUP, 16 TO 64 YEARS OLD. PERSONS OVER 65 ACCOUNTED FOR 46,668* (16.2* PERCENT OF THE TOTAL POPULATION).

EMPLOYMENT AND UNEMPLOYMENT

THE CIVILIAN LABOR FORCE IN THIS AREA WAS 139,943* COMPRISED OF 122,996* (87.9* PERCENT) WHITES, 3,087* (2.2* PERCENT) BLACKS, 13,860* (9.9* PERCENT) OTHER RACES, AND 15,294* (10.9* PERCENT) SPANISH-AMERICANS. THE TOTAL LABOR FORCE PARTICIPATION RATE WAS 60.4* PERCENT.
CIVILIAN EMPLOYMENT IN THE AREA TOTALED 134,208* WITH 117,828* (87.8* PERCENT) WHITES AT WORK, 2,952*(2.2* PERCENT) BLACKS, 13,428* (10.0* PERCENT) OTHER RACES, AND 14,569* (10.9* PERCENT) SPANISH-AMERICANS. THE LARGEST NUMBER OF JOBS OCCURRED IN THE FOLLOWING FOUR MAJOR INDUSTRY DIVISIONS --

SERVICES
RETAIL TRADE
FIN, INS AND REAL ESTATE
MANUFACTURING

FEDERAL, STATE AND LOCAL GOVERNMENTS EMPLOYED 26,969* PERSONS IN NONAGRICULTURAL JOBS, 20.1* PERCENT OF THE TOTAL EMPLOYED IN THE AREA.

THE OCCUPATIONAL GROUPS EMPLOYING THE LARGEST NUMBER OF PERSONS IN EACH RACIAL AND ETHNIC GROUP WERE --

	ALL RACES	WHITE	BLACK	OTHER RACES	SPANISH-AMERICAN
TOTAL EMPLOYED, NUMBER	134,208*	117,828*	2,952*	13,428*	14,569*
HORIZONTAL PERCENT	100.0	87.8*	2.2*	10.0*	10.9*
VERTICAL PERCENT	100.0	100.0	100.0	100.0	100.0
WHITE COLLAR WORKERS	69.7	70.8*	53.8*	63.7*	56.5*
BLUE COLLAR WORKERS	18.7*	18.6	23.0*	18.5*	28.6*
SERVICE WORKERS	11.4*	10.4*	22.2*	17.7*	14.7*
FARM WORKERS	0.2*	0.2*	1.0*	0.1*	0.1*

TOTAL EMPLOYMENT IN LOW PAY AND LOW STATUS OCCUPATIONS WAS 7.6* PERCENT FOR WHITES, 18.1* PERCENT FOR BLACKS, 15.9* PERCENT FOR OTHER RACES, AND 12.7* PERCENT FOR SPANISH-AMERICANS.

UNEMPLOYMENT TOTALED 5,735* OR 4.1* PERCENT OF THE CIVILIAN LABOR FORCE. APRIL 1970 UNEMPLOYMENT RATES BY RACE/ETHNIC GROUPS WERE--WHITES, 4.2* PERCENT; BLACKS 4.4* PERCENT; OTHER RACES, 3.1* PERCENT; SPANISH-AMERICANS, 4.7* PERCENT. PERSONS OVER 16 YEARS OLD NOT IN THE ARMED FORCES, NOT AT WORK AND NOT LOOKING FOR WORK TOTALED 93,935*. OF THESE 2.7* PERCENT WERE IN INSTITUTIONS AND 14.8* PERCENT WERE ENROLLED IN SCHOOL. THERE WERE 8,469* PERSONS IN THE AREA BETWEEN 16-64 YEARS OLD WHO WERE DISABLED OR HANDICAPPED.

INCOME AND POVERTY STATUS

DURING THE CALENDER YEAR 1969, ONE HALF OF THE FAMILIES IN THE AREA RECEIVED UNDER $12,546* PER YEAR. SOME 3,920* (5.2* PERCENT OF THE FAMILIES) RECEIVED LESS THAN THE POVERTY LEVEL WHILE 27,610* (36.7* PERCENT) RECEIVED MORE THAN $15,000. IN 1969, ONE HALF OF THE UNRELATED INDIVIDUALS RECEIVED LESS THAN $5,414*; 10,264* (19.0* PERCENT OF THESE INDIVIDUALS) WERE BELOW THE POVERTY LEVEL, WHILE 3,149* (5.5* PERCENT) HAD INCOMES OVER $15,000. MEDIAN WHITE FAMILY INCOME WAS $12,587* COMPARED WITH $10,911* FOR BLACKS, $12,515* FOR OTHER RACES, AND $11,307* FOR SPANISH-AMERICANS.

FAMILIES BELOW POVERTY RECEIVED A MEAN INCOME OF $1,449* IN 1969; 10.8* PERCENT OF THE POVERTY FAMILIES RECEIVED PUBLIC ASSISTANCE INCOME. OF THE POVERTY FAMILIES, 1,143* (29.2* PERCENT) WERE HEADED BY WOMEN.

THE TOTAL NUMBER OF PERSONS IN POVERTY WAS 22,349* (7.9* PERCENT OF ALL PERSONS).
THE 'NEAR POOR' PERSONS WITH INCOME LESS THAN 125 PERCENT OF THE POVERTY LEVEL TOTALED 29,562* (10.4* PERCENT OF ALL PERSONS) WHILE THE 'POOR POOR' PERSONS WITH INCOME LESS THAN 75 PERCENT OF THE POVERTY LEVEL NUMBERED 16,075* (5.7* PERCENT OF ALL PERSONS).

VETERANS

AMONG MALES 16 YEARS OLD AND OVER, 45,453 (42.9* PERCENT) WERE VETERANS. MEN WHO SERVED DURING THE VIETNAM WAR PERIOD NUMBERED 7,443; DURING THE KOREAN CONFLICT, 5,846. SOME 2,087 HAD SERVED IN BOTH KOREA AND WORLD WAR II. SERVICE IN PREVIOUS PERIODS ACCOUNTED FOR 30,077 VETERANS.

EDUCATIONAL ATTAINMENT

OF THE TOTAL POPULATION OVER 25 YEARS OLD, 59,200* (30.2* PERCENT) HAD LESS THAN A HIGH SCHOOL EDUCATION. HOWEVER, 69.8* PERCENT HAD GRADUATED FROM HIGH SCHOOL AND 20.1* PERCENT WERE COLLEGE GRADUATES. ONE HALF OF THE WHITE POPULATION IN THIS AGE GROUP HAD AT LEAST 12.7* YEARS OF EDUCATION, COMPARED WITH 12.4* YEARS FOR BLACKS, 12.8* YEARS FOR OTHER RACES AND 12.6* YEARS FOR SPANISH-AMERICANS.

SCHOOL ENROLLMENT RATES FOR PERSONS 16-21 YEARS OLD WERE 64.2* PERCENT FOR THE WHITE POPULATION, 49.4* PERCENT FOR BLACKS, 79.5* PERCENT FOR OTHER RACES, AND 62.3* PERCENT FOR SPANISH-AMERICANS. OF THE POPULATION 16-21 YEARS OLD, SOME 8,671* (35.1* PERCENT) WERE NOT ENROLLED IN SCHOOL; OF THIS TOTAL 6,781* WERE HIGH SCHOOL GRADUATES AND 1,890* WERE SCHOOL DROPOUTS. ABOUT 26.9* PERCENT OF THE GRADUATES AND 55.0* PERCENT OF THE DROPOUTS WERE UNEMPLOYED OR NOT IN THE LABOR FORCE.

TABLE 1
POPULATION BY RACE, ETHNIC GROUP, SEX AND AGE
(SECOND COUNT DATA)1/

RACIAL GROUP

THE TOTAL POPULATION OF THIS AREA IN APRIL 1970 WAS 288,748 COMPOSED OF 36,505 (12.6 PERCENT) RACIAL MINORITIES (BLACK AND OTHER RACES) AND 252,243 (87.4 PERCENT WHITES. THE SPANISH-AMERICAN ETHNIC GROUP, WHICH CAN INCLUDE WHITES, BLACKS OR OTHER RACES, ACCOUNTED FOR 34,194* (11.8* PERCENT) OF THE POPULATION. THE AREA'S POPULATION INCLUDES THE FOLLOWING NUMBER OF MALES AND FEMALES IN EACH RACIAL GROUP -

	NUMBER			PERCENT DISTRIBUTION (VERTICAL)			PERCENT DISTRIBUTION (HORIZONTAL)		
RACIAL GROUP	TOTAL	MALE	FEMALE	TOTAL	MALE	FEMALE	TOTAL	MALE	FEMALE
TOTAL ALL RACES	288,748	132,251	156,497	100.0	100.0	100.0	100.0	45.8	54.2

FOR

SAN FRANCISCO, DISTRICT 6
SUBDISTRICT A
MARINA/PACIFIC HEIGHTS/
INNER RICHMOND

NOTE -- AN ASTERISK (*) FOLLOWING A DATA ITEM INDICATES A DISCLOSURE SUPPRESSION. THE BUREAU OF THE CENSUS DID NOT RELEASE DATA WHEN TOO FEW INDIVIDUALS WERE COUNTED IN A PARTICULAR CATEGORY IN ORDER TO PREVENT DISCLOSURE OF INFORMATION ABOUT INDIVIDUALS. THE SUPPRESSED DATA IS COUNTED AS ZERO WHEN USED IN CALCULATIONS. THE ASTERISK WILL APPEAR WHEN A SUPPRESSION OCCURRED IN ANY NUMBER USED IN THE CALCULATION OF THE ITEM. FOR EXAMPLE, WHERE A SUPPRESSION OCCURRED IN A TOTAL, ALL PERCENTAGES CALCULATED FROM THAT TOTAL WILL SHOW THE SUPPRESSION ASTERISK.

SPANISH AMERICAN -- IN 42 STATES AND DISTRICT OF COLUMBIA, THIS POPULATION IS IDENTIFIED AS -PERSONS OF SPANISH LANGUAGE-; IN FIVE SOUTHWESTERN STATES, AS -PERSONS OF SPANISH LANGUAGE OR SPANISH SURNAME-; AND IN THE MIDDLE ATLANTIC STATES, AS -PERSONS OF PUERTO RICAN BIRTH OR PARENTAGE-.

SPANISH AMERICANS ARE ALSO COUNTED IN THE RACIAL CATEGORIES AS WHITE, BLACK OR OTHER RACES.

The availability of data from the 1970 Census of Population on computer tapes provides Census users with unique opportunities to tailor output to individual requirements and to execute the statistical operations necessary to sharpen the analysis of economic and social conditions in the United States.

The Manpower Administration has taken full advantage of the opportunities presented by the 1970 Census and of computer technology by compiling a series of reports based on information contained in the second and fourth count summary tapes. These reports, which include much unpublished data, were prepared cooperatively by Federal, State, and local research personnel. They are specially geared to the informational needs of manpower program managers and staff specialists, manpower planners, and research workers in human resource programs. The use of computers permitted the creation of manpower profiles for administrative areas; thus, in addition to the usual geography--States, counties, cities, etc.--the reports in this series also include information on Department of Labor's administrative areas and those of State Employment Security agencies and other associated organizations.

The major reports prepared from the second and fourth count summary tapes are:

1. Summary Manpower Indicators
2. Detailed Manpower Indicators
3. Inter-Area Manpower Comparisons
4. Manpower Indicator Atlas

The reports were planned and written in the Manpower Administration, Region IX Data Systems and Reports Division, Walter Postle, Chief, in cooperation with staff of the Employment Security research and analysis staffs in Arizona, California, Hawaii, and Nevada.

Special thanks are due to Susan Holland, Economist in the Region IX-X Office of the Bureau of Labor Statistics, who prepared the bulk of the Summary Manpower Indicators report; to Bruce Bargmeyer, Manpower Development Specialist in the Region IX Data Systems and Reports Division, who worked tirelessly in bringing this project to completion; to William Grannell, Research Analyst in the California Department of Human Resources Development who made substantial contributions to the inter-area comparison report; to Susan Wisler, Manpower Economist in the Nevada Employment Security Department; to Richard Froncek of the Arizona Employment Security Commission and Fred Pang, Research Statistician in the Hawaii Department of Labor and Industrial Relations. Out thanks are also due to Carl Quong and his expert staff in the Applications Programming Group of the Lawrence Berkeley Laboratory, University of California, who prepared the computer programs for this project.

MANPOWER PROFILE

SAN FRANCISCO, DISTRICT 6
SUBDISTRICT A
MARINA/PACIFIC HEIGHTS/
INNER RICHMOND

RACIAL AND ETHNIC CHARACTERISTICS

THE TOTAL POPULATION OF THE AREA IN APRIL 1970 WAS 51,513 WITH A RACIAL COMPOSITION OF WHITES, 47,212 (91.6 PERCENT); BLACKS, 927* (1.8* PERCENT); OTHER RACES, 3,374* (6.5* PERCENT). THE SPANISH AMERICAN ETHNIC GROUP (ALSO COUNTED PRIMARILY IN THE WHITE RACE, BUT INCLUDES SOME BLACKS AND OTHER RACES) ACCOUNTED FOR 3,270 (6.3 PERCENT OF THE POPULATION). PERSONS OF FOREIGN STOCK MADE UP 21,400 (41.5 PERCENT OF THE TOTAL POPULATION).

AGE

ONE HALF OF THE MALE WHITE POPULATION WAS BELOW 37.5 YEARS OLD, COMPARED WITH 23.0* YEARS FOR MALE BLACKS, 28.2* YEARS FOR MALES IN OTHER RACES, AND 30.7 YEARS FOR MALE SPANISH-AMERICANS. THE RESPECTIVE MEDIAN AGES FOR FEMALES WERE--WHITE 44.0 YEARS, BLACK 21.7* YEARS, OTHER RACES 30.0* YEARS AND SPANISH-AMERICANS 29.6 YEARS. SOME 36,264 (70.4 PERCENT OF THE TOTAL POPULATION) WERE IN THE PRIME WORKING AGE GROUP, 16 TO 64 YEARS OLD. PERSONS OVER 65 ACCOUNTED FOR 9,360 (18.2 PERCENT OF THE TOTAL POPULATION).

EMPLOYMENT AND UNEMPLOYMENT

THE CIVILIAN LABOR FORCE IN THIS AREA WAS 27,044 COMPRISED OF 25,078 (92.7 PERCENT) WHITES, 253* (0.9* PERCENT) BLACKS, 1,713* (6.3* PERCENT) OTHER RACES, AND 1,573 (5.8 PERCENT) SPANISH-AMERICANS. THE TOTAL LABOR FORCE PARTICIPATION RATE WAS 65.5 PERCENT.
CIVILIAN EMPLOYMENT IN THE AREA TOTALED 26,249 WITH 24,342 (92.7 PERCENT) WHITES AT WORK, 239*(0.9* PERCENT) BLACKS, 1,668* (6.4* PERCENT) OTHER RACES, AND 1,516 (5.8 PERCENT) SPANISH-AMERICANS. THE LARGEST NUMBER OF JOBS OCCURRED IN THE FOLLOWING FOUR MAJOR INDUSTRY DIVISIONS --

SERVICES
FIN, INS AND REAL ESTATE
RETAIL TRADE
MANUFACTURING

FEDERAL, STATE AND LOCAL GOVERNMENTS EMPLOYED 4,026 PERSONS IN NONAGRICULTURAL JOBS, 15.3 PERCENT OF THE TOTAL EMPLOYED IN THE AREA.

THE OCCUPATIONAL GROUPS EMPLOYING THE LARGEST NUMBER OF PERSONS IN EACH RACIAL AND ETHNIC GROUP WERE --

SERVICE WORKERS	10.5	9.5*	33.1*	23.1*	14.4*
FARM WORKERS	0.1	0.1	0.0*	0.0*	0.0

TOTAL EMPLOYMENT IN LOW PAY AND LOW STATUS OCCUPATIONS WAS 6.2 PERCENT FOR WHITES, 28.0* PERCENT FOR BLACKS, 21.0* PERCENT FOR OTHER RACES, AND 10.8 PERCENT FOR SPANISH-AMERICANS.

UNEMPLOYMENT TOTALED 795 OR 2.9 PERCENT OF THE CIVILIAN LABOR FORCE. APRIL 1970 UNEMPLOYMENT RATES BY RACE/ETHNIC GROUPS WERE--WHITES, 2.9 PERCENT; BLACKS 5.5* PERCENT; OTHER RACES, 2.6* PERCENT; SPANISH-AMERICANS, 3.6 PERCENT. PERSONS OVER 16 YEARS OLD NOT IN THE ARMED FORCES, NOT AT WORK AND NOT LOOKING FOR WORK TOTALED 15,726. OF THESE 2.0 PERCENT WERE IN INSTITUTIONS AND 10.6 PERCENT WERE ENROLLED IN SCHOOL. THERE WERE 1,206 PERSONS IN THE AREA BETWEEN 16-64 YEARS OLD WHO WERE DISABLED OR HANDICAPPED.

INCOME AND POVERTY STATUS

DURING THE CALENDER YEAR 1969, ONE HALF OF THE FAMILIES IN THE AREA RECEIVED UNDER $13,747 PER YEAR. SOME 577 (4.9 PERCENT OF THE FAMILIES) RECEIVED LESS THAN THE POVERTY LEVEL WHILE 5,201 (44.5 PERCENT) RECEIVED MORE THAN $15,000. IN 1969, ONE HALF OF THE UNRELATED INDIVIDUALS RECEIVED LESS THAN $6,146; 2,277 (12.8 PERCENT OF THESE INDIVIDUALS) WERE BELOW THE POVERTY LEVEL, WHILE 1,570 (8.0 PERCENT) HAD INCOMES OVER $15,000. MEDIAN WHITE FAMILY INCOME WAS $14,079 COMPARED WITH $9,343* FOR BLACKS, $11,554* FOR OTHER RACES, AND $12,494 FOR SPANISH-AMERICANS.

FAMILIES BELOW POVERTY RECEIVED A MEAN INCOME OF $1,339* IN 1969; 7.8 PERCENT OF THE POVERTY FAMILIES RECEIVED PUBLIC ASSISTANCE INCOME. OF THE POVERTY FAMILIES, 181 (31.4 PERCENT) WERE HEADED BY WOMEN.

THE TOTAL NUMBER OF PERSONS IN POVERTY WAS 3,875 (7.8 PERCENT OF ALL PERSONS).
THE 'NEAR POOR' PERSONS WITH INCOME LESS THAN 125 PERCENT OF THE POVERTY LEVEL TOTALED 5,282 (10.7 PERCENT OF ALL PERSONS) WHILE THE 'POOR POOR' PERSONS WITH INCOME LESS THAN 75 PERCENT OF THE POVERTY LEVEL NUMBERED 2,911 (5.9 PERCENT OF ALL PERSONS).

VETERANS

AMONG MALES 16 YEARS OLD AND OVER, 8,374 (44.1 PERCENT) WERE VETERANS. MEN WHO SERVED DURING THE VIETNAM WAR PERIOD NUMBERED 1,468; DURING THE KOREAN CONFLICT, 1,138. SOME 473 HAD SERVED IN BOTH KOREA AND WORLD WAR II. SERVICE IN PREVIOUS PERIODS ACCOUNTED FOR 5,295 VETERANS.

EDUCATIONAL ATTAINMENT

OF THE TOTAL POPULATION OVER 25 YEARS OLD, 8,390 (22.1 PERCENT) HAD LESS THAN A HIGH SCHOOL EDUCATION. HOWEVER, 77.9 PERCENT HAD GRADUATED FROM HIGH SCHOOL AND 29.8 PERCENT WERE COLLEGE GRADUATES. ONE HALF OF THE WHITE POPULATION IN THIS AGE GROUP HAD AT LEAST 14.4 YEARS OF EDUCATION, COMPARED WITH 12.8* YEARS FOR BLACKS, 12.7* YEARS FOR OTHER RACES AND 13.7 YEARS FOR SPANISH-AMERICANS.

SCHOOL ENROLLMENT RATES FOR PERSONS 16-21 YEARS OLD WERE 44.3 PERCENT FOR THE WHITE POPULATION, 26.9 PERCENT FOR BLACKS, 60.0* PERCENT FOR OTHER RACES, AND 44.9 PERCENT FOR SPANISH-AMERICANS. OF THE POPULATION 16-21 YEARS OLD, SOME 1,961 (53.6 PERCENT) WERE NOT ENROLLED IN SCHOOL; OF THIS TOTAL 1,624 WERE HIGH SCHOOL GRADUATES AND 337 WERE SCHOOL DROPOUTS. ABOUT 13.7 PERCENT OF THE GRADUATES AND 24.3 PERCENT OF THE DROPOUTS WERE UNEMPLOYED OR NOT IN THE LABOR FORCE.

TABLE 1
POPULATION BY RACE, ETHNIC GROUP, SEX AND AGE
(SECOND COUNT DATA)1/

RACIAL GROUP

THE TOTAL POPULATION OF THIS AREA IN APRIL 1970 WAS 51,265 COMPOSED OF 4,311 (8.4 PERCENT) RACIAL MINORITIES (BLACK AND OTHER RACES) AND 46,954 (91.6 PERCENT WHITES. THE SPANISH-AMERICAN ETHNIC GROUP, WHICH CAN INCLUDE WHITES, BLACKS OR OTHER RACES, ACCOUNTED FOR 3,270 (6.4 PERCENT) OF THE POPULATION. THE AREA'S POPULATION INCLUDES THE FOLLOWING NUMBER OF MALES AND FEMALES IN EACH RACIAL GROUP -

	NUMBER			PERCENT DISTRIBUTION (VERTICAL)			PERCENT DISTRIBUTION (HORIZONTAL)		
RACIAL GROUP	TOTAL	MALE	FEMALE	TOTAL	MALE	FEMALE	TOTAL	MALE	FEMALE

SUMMARY MANPOWER INDICATORS

FOR

SAN FRANCISCO, DISTRICT 6
SUBDISTRICT B
OUTER RICHMOND

NOTE -- AN ASTERISK (*) FOLLOWING A DATA ITEM INDICATES A DISCLOSURE SUPPRESSION. THE BUREAU OF THE CENSUS DID NOT RELEASE DATA WHEN TOO FEW INDIVIDUALS WERE COUNTED IN A PARTICULAR CATEGORY IN ORDER TO PREVENT DISCLOSURE OF INFORMATION ABOUT INDIVIDUALS. THE SUPPRESSED DATA IS COUNTED AS ZERO WHEN USED IN CALCULATIONS. THE ASTERISK WILL APPEAR WHEN A SUPPRESSION OCCURRED IN ANY NUMBER USED IN THE CALCULATION OF THE ITEM. FOR EXAMPLE, WHERE A SUPPRESSION OCCURRED IN A TOTAL, ALL PERCENTAGES CALCULATED FROM THAT TOTAL WILL SHOW THE SUPPRESSION ASTERISK.

SPANISH AMERICAN -- IN 42 STATES AND DISTRICT OF COLUMBIA, THIS POPULATION IS IDENTIFIED AS -PERSONS OF SPANISH LANGUAGE-; IN FIVE SOUTHWESTERN STATES, AS -PERSONS OF SPANISH LANGUAGE OR SPANISH SURNAME-; AND IN THE MIDDLE ATLANTIC STATES, AS -PERSONS OF PUERTO RICAN BIRTH OR PARENTAGE-.

SPANISH AMERICANS ARE ALSO COUNTED IN THE RACIAL CATEGORIES AS WHITE, BLACK OR OTHER RACES.

The availability of data from the 1970 Census of Population on computer tapes provides Census users with unique opportunities to tailor output to individual requirements and to execute the statistical operations necessary to sharpen the analysis of economic and social conditions in the United States.

The Manpower Administration has taken full advantage of the opportunities presented by the 1970 Census and of computer technology by compiling a series of reports based on information contained in the second and fourth count summary tapes. These reports, which include much unpublished data, were prepared cooperatively by Federal, State, and local research personnel. They are specially geared to the informational needs of manpower program managers and staff specialists, manpower planners, and research workers in human resource programs. The use of computers permitted the creation of manpower profiles for administrative areas; thus, in addition to the usual geography--States, counties, cities, etc.——the reports in this series also include information on Department of Labor's administrative areas and those of State Employment Security agencies and other associated organizations.

The major reports prepared from the second and fourth count summary tapes are:

1. Summary Manpower Indicators
2. Detailed Manpower Indicators
3. Inter-Area Manpower Comparisons
4. Manpower Indicator Atlas

The reports were planned and written in the Manpower Administration, Region IX Data Systems and Reports Division, Walter Postle, Chief, in cooperation with staff of the Employment Security research and analysis staffs in Arizona, California, Hawaii, and Nevada.

Special thanks are due to Susan Holland, Economist in the Region IX-X Office of the Bureau of Labor Statistics, who prepared the bulk of the Summary Manpower Indicators report; to Bruce Bargmeyer, Manpower Development Specialist in the Region IX Data Systems and Reports Division, who worked tirelessly in bringing this project to completion; to William Grannell, Research Analyst in the California Department of Human Resources Development who made substantial contributions to the inter-area comparison report; to Susan Wisler, Manpower Economist in the Nevada Employment Security Department; to Richard Froncek of the Arizona Employment Security Commission and Fred Pang, Research Statistician in the Hawaii Department of Labor and Industrial Relations. Out thanks are also due to Carl Quong and his expert staff in the Applications Programming Group of the Lawrence Berkeley Laboratory, University of California, who prepared the computer programs for this project.

Technical Notes	17

RACIAL AND ETHNIC CHARACTERISTICS

THE TOTAL POPULATION OF THE AREA IN APRIL 1970 WAS 37,401* WITH A RACIAL COMPOSITION OF WHITES, 27,775* (74.3* PERCENT); BLACKS, 738 (2.0* PERCENT); OTHER RACES, 8,888* (23.8* PERCENT). THE SPANISH AMERICAN ETHNIC GROUP (ALSO COUNTED PRIMARILY IN THE WHITE RACE, BUT INCLUDES SOME BLACKS AND OTHER RACES) ACCOUNTED FOR 2,872 (7.7* PERCENT OF THE POPULATION). PERSONS OF FOREIGN STOCK MADE UP 21,158 (56.6* PERCENT OF THE TOTAL POPULATION).

AGE

ONE HALF OF THE MALE WHITE POPULATION WAS BELOW 39.8* YEARS OLD, COMPARED WITH 23.5 YEARS FOR MALE BLACKS, 25.2* YEARS FOR MALES IN OTHER RACES, AND 24.8 YEARS FOR MALE SPANISH-AMERICANS. THE RESPECTIVE MEDIAN AGES FOR FEMALES WERE--WHITE 46.1* YEARS, BLACK 37.7 YEARS, OTHER RACES 29.6* YEARS AND SPANISH-AMERICANS 27.7 YEARS. SOME 24,369* (65.2* PERCENT OF THE TOTAL POPULATION) WERE IN THE PRIME WORKING AGE GROUP, 16 TO 64 YEARS OLD. PERSONS OVER 65 ACCOUNTED FOR 6,219* (16.6* PERCENT OF THE TOTAL POPULATION).

EMPLOYMENT AND UNEMPLOYMENT

THE CIVILIAN LABOR FORCE IN THIS AREA WAS 18,742* COMPRISED OF 14,111* (75.3* PERCENT) WHITES, 423 (2.3* PERCENT) BLACKS, 4,208* (22.5* PERCENT) OTHER RACES, AND 1,448 (7.7* PERCENT) SPANISH-AMERICANS. THE TOTAL LABOR FORCE PARTICIPATION RATE WAS 61.5* PERCENT.
CIVILIAN EMPLOYMENT IN THE AREA TOTALED 18,010* WITH 13,535* (75.2* PERCENT) WHITES AT WORK, 412(2.3* PERCENT) BLACKS, 4,063* (22.6* PERCENT) OTHER RACES, AND 1,408 (7.8* PERCENT) SPANISH-AMERICANS. THE LARGEST NUMBER OF JOBS OCCURRED IN THE FOLLOWING FOUR MAJOR INDUSTRY DIVISIONS --

SERVICES
RETAIL TRADE
FIN, INS AND REAL ESTATE
MANUFACTURING

FEDERAL, STATE AND LOCAL GOVERNMENTS EMPLOYED 3,239* PERSONS IN NONAGRICULTURAL JOBS, 18.0* PERCENT OF THE TOTAL EMPLOYED IN THE AREA.

THE OCCUPATIONAL GROUPS EMPLOYING THE LARGEST NUMBER OF PERSONS IN EACH RACIAL AND ETHNIC GROUP WERE --

	ALL RACES	WHITE	BLACK	OTHER RACES	SPANISH-AMERICAN
TOTAL EMPLOYED, NUMBER	18,010*	13,535*	412	4,063*	1,408
HORIZONTAL PERCENT	100.0	75.2*	2.3*	22.6*	7.8*
VERTICAL PERCENT	100.0	100.0	100.0	100.0	100.0
WHITE COLLAR WORKERS	69.4*	72.1	59.2*	61.8*	68.3*
BLUE COLLAR WORKERS	17.5*	16.7*	18.7*	20.1*	16.0*
SERVICE WORKERS	12.7*	10.9*	22.1*	18.0*	15.3*
FARM WORKERS	0.3*	0.3*	0.0	0.1*	0.4

TOTAL EMPLOYMENT IN LOW PAY AND LOW STATUS OCCUPATIONS WAS 8.6* PERCENT FOR WHITES, 17.7 PERCENT FOR BLACKS, 16.7* PERCENT FOR OTHER RACES, AND 12.8 PERCENT FOR SPANISH-AMERICANS.

UNEMPLOYMENT TOTALED 732* OR 3.9* PERCENT OF THE CIVILIAN LABOR FORCE. APRIL 1970 UNEMPLOYMENT RATES BY RACE/ETHNIC GROUPS WERE--WHITES, 4.1* PERCENT; BLACKS 2.6 PERCENT; OTHER RACES, 3.4* PERCENT; SPANISH-AMERICANS, 2.8 PERCENT. PERSONS OVER 16 YEARS OLD NOT IN THE ARMED FORCES, NOT AT WORK AND NOT LOOKING FOR WORK TOTALED 11,780*. OF THESE 1.2* PERCENT WERE IN INSTITUTIONS AND 15.6* PERCENT WERE ENROLLED IN SCHOOL. THERE WERE 763* PERSONS IN THE AREA BETWEEN 16-64 YEARS OLD WHO WERE DISABLED OR HANDICAPPED.

INCOME AND POVERTY STATUS

DURING THE CALENDER YEAR 1969, ONE HALF OF THE FAMILIES IN THE AREA RECEIVED UNDER $11,853* PER YEAR. SOME 555* (5.7* PERCENT OF THE FAMILIES) RECEIVED LESS THAN THE POVERTY LEVEL WHILE 3,287* (33.6* PERCENT) RECEIVED MORE THAN $15,000. IN 1969, ONE HALF OF THE UNRELATED INDIVIDUALS RECEIVED LESS THAN $4,953*; 1,530* (22.5* PERCENT OF THESE INDIVIDUALS) WERE BELOW THE POVERTY LEVEL, WHILE 262* (3.9* PERCENT) HAD INCOMES OVER $15,000.
MEDIAN WHITE FAMILY INCOME WAS $11,807* COMPARED WITH $11,384 FOR BLACKS, $12,070* FOR OTHER RACES, AND $11,351 FOR SPANISH-AMERICANS.

FAMILIES BELOW POVERTY RECEIVED A MEAN INCOME OF $1,313* IN 1969; 5.9* PERCENT OF THE POVERTY FAMILIES RECEIVED PUBLIC ASSISTANCE INCOME. OF THE POVERTY FAMILIES, 146* (26.3* PERCENT) WERE HEADED BY WOMEN.

THE TOTAL NUMBER OF PERSONS IN POVERTY WAS 3,118* (8.4* PERCENT OF ALL PERSONS).
THE 'NEAR POOR' PERSONS WITH INCOME LESS THAN 125 PERCENT OF THE POVERTY LEVEL TOTALED 4,058* (10.9* PERCENT OF ALL PERSONS) WHILE THE 'POOR POOR' PERSONS WITH INCOME LESS THAN 75 PERCENT OF THE POVERTY LEVEL NUMBERED 2,304* (6.2* PERCENT OF ALL PERSONS).

VETERANS

AMONG MALES 16 YEARS OLD AND OVER, 5,397 (40.6* PERCENT) WERE VETERANS. MEN WHO SERVED DURING THE VIETNAM WAR PERIOD NUMBERED 974; DURING THE KOREAN CONFLICT, 607. SOME 242 HAD SERVED IN BOTH KOREA AND WORLD WAR II.
SERVICE IN PREVIOUS PERIODS ACCOUNTED FOR 3,574 VETERANS.

EDUCATIONAL ATTAINMENT

OF THE TOTAL POPULATION OVER 25 YEARS OLD, 7,278* (29.1* PERCENT) HAD LESS THAN A HIGH SCHOOL EDUCATION. HOWEVER, 70.9* PERCENT HAD GRADUATED FROM HIGH SCHOOL AND 19.5* PERCENT WERE COLLEGE GRADUATES. ONE HALF OF THE WHITE POPULATION IN THIS AGE GROUP HAD AT LEAST 12.8* YEARS OF EDUCATION, COMPARED WITH 12.7 YEARS FOR BLACKS, 12.8* YEARS FOR OTHER RACES AND 13.0 YEARS FOR SPANISH-AMERICANS.

SCHOOL ENROLLMENT RATES FOR PERSONS 16-21 YEARS OLD WERE 65.5* PERCENT FOR THE WHITE POPULATION, 27.2* PERCENT FOR BLACKS, 81.8* PERCENT FOR OTHER RACES, AND 65.6 PERCENT FOR SPANISH-AMERICANS. OF THE POPULATION 16-21 YEARS OLD, SOME 1,110* (32.0* PERCENT) WERE NOT ENROLLED IN SCHOOL; OF THIS TOTAL 857* WERE HIGH SCHOOL GRADUATES AND 253* WERE SCHOOL DROPOUTS. ABOUT 26.4* PERCENT OF THE GRADUATES AND 51.8* PERCENT OF THE DROPOUTS WERE UNEMPLOYED OR NOT IN THE LABOR FORCE.

NOTE -- AN ASTERISK (*) FOLLOWING A DATA ITEM INDICATES A DISCLOSURE SUPPRESSION. THE BUREAU OF THE CENSUS DID NOT RELEASE DATA WHEN TOO FEW INDIVIDUALS WERE COUNTED IN A PARTICULAR CATEGORY IN ORDER TO PREVENT DISCLOSURE OF INFORMATION ABOUT INDIVIDUALS. THE SUPPRESSED DATA IS COUNTED AS ZERO WHEN USED IN CALCULATIONS. THE ASTERISK WILL APPEAR WHEN A SUPPRESSION OCCURRED IN ANY NUMBER USED IN THE CALCULATION OF THE ITEM. FOR EXAMPLE, WHERE A SUPPRESSION OCCURRED IN A TOTAL, ALL PERCENTAGES CALCULATED FROM THAT TOTAL WILL SHOW THE SUPPRESSION ASTERISK.

SPANISH AMERICAN -- IN 42 STATES AND DISTRICT OF COLUMBIA, THIS POPULATION IS IDENTIFIED AS -PERSONS OF SPANISH LANGUAGE-; IN FIVE SOUTHWESTERN STATES, AS -PERSONS OF SPANISH LANGUAGE OR SPANISH SURNAME-; AND IN THE MIDDLE ATLANTIC STATES, AS -PERSONS OF PUERTO RICAN BIRTH OR PARENTAGE-.

SPANISH AMERICANS ARE ALSO COUNTED IN THE RACIAL CATEGORIES AS WHITE, BLACK OR OTHER RACES.

The availability of data from the 1970 Census of Population on computer tapes provides Census users with unique opportunities to tailor output to individual requirements and to execute the statistical operations necessary to sharpen the analysis of economic and social conditions in the United States.

The Manpower Administration has taken full advantage of the opportunities presented by the 1970 Census and of computer technology by compiling a series of reports based on information contained in the second and fourth count summary tapes. These reports, which include much unpublished data, were prepared cooperatively by Federal, State, and local research personnel. They are specially geared to the informational needs of manpower program managers and staff specialists, manpower planners, and research workers in human resource programs. The use of computers permitted the creation of manpower profiles for administrative areas; thus, in addition to the usual geography--States, counties, cities, etc.--the reports in this series also include information on Department of Labor's administrative areas and those of State Employment Security agencies and other associated organizations.

The major reports prepared from the second and fourth count summary tapes are:

1. Summary Manpower Indicators
2. Detailed Manpower Indicators
3. Inter-Area Manpower Comparisons
4. Manpower Indicator Atlas

The reports were planned and written in the Manpower Administration, Region IX Data Systems and Reports Division, Walter Postle, Chief, in cooperation with staff of the Employment Security research and analysis staffs in Arizona, California, Hawaii, and Nevada.

Special thanks are due to Susan Holland, Economist in the Region IX-X Office of the Bureau of Labor Statistics, who prepared the bulk of the Summary Manpower Indicators report; to Bruce Bargmeyer, Manpower Development Specialist in the Region IX Data Systems and Reports Division, who worked tirelessly in bringing this project to completion; to William Grannell, Research Analyst in the California Department of Human Resources Development who made substantial contributions to the inter-area comparison report; to Susan Wisler, Manpower Economist in the Nevada Employment Security Department; to Richard Froncek of the Arizona Employment Security Commission and Fred Pang, Research Statistician in the Hawaii Department of Labor and Industrial Relations. Out thanks are also due to Carl Quong and his expert staff in the Applications Programming Group of the Lawrence Berkeley Laboratory, University of California, who prepared the computer programs for this project.

MANPOWER PROFILE

SAN FRANCISCO, DISTRICT 6
SUBDISTRICT C
GOLDEN GATE PARK/SUNSET/
GREAT HIGHWAY

RACIAL AND ETHNIC CHARACTERISTICS

THE TOTAL POPULATION OF THE AREA IN APRIL 1970 WAS 44,609 WITH A RACIAL COMPOSITION OF WHITES, 38,899 (87.2 PERCENT); BLACKS, 603 (1.4 PERCENT); OTHER RACES, 5,107 (11.4 PERCENT). THE SPANISH AMERICAN ETHNIC GROUP (ALSO COUNTED PRIMARILY IN THE WHITE RACE, BUT INCLUDES SOME BLACKS AND OTHER RACES) ACCOUNTED FOR 4,704* (10.5* PERCENT OF THE POPULATION). PERSONS OF FOREIGN STOCK MADE UP 22,748 (51.0 PERCENT OF THE TOTAL POPULATION).

AGE

ONE HALF OF THE MALE WHITE POPULATION WAS BELOW 37.4 YEARS OLD, COMPARED WITH 26.4 YEARS FOR MALE BLACKS, 29.2 YEARS FOR MALES IN OTHER RACES, AND 28.7* YEARS FOR MALE SPANISH-AMERICANS. THE RESPECTIVE MEDIAN AGES FOR FEMALES WERE--WHITE 45.5 YEARS, BLACK 27.7 YEARS, OTHER RACES 26.4 YEARS AND SPANISH-AMERICANS 31.7* YEARS. SOME 29,047 (65.1 PERCENT OF THE TOTAL POPULATION) WERE IN THE PRIME WORKING AGE GROUP, 16 TO 64 YEARS OLD. PERSONS OVER 65 ACCOUNTED FOR 7,417 (16.6 PERCENT OF THE TOTAL POPULATION).

EMPLOYMENT AND UNEMPLOYMENT

THE CIVILIAN LABOR FORCE IN THIS AREA WAS 21,753 COMPRISED OF 18,955 (87.1 PERCENT) WHITES, 330 (1.5 PERCENT) BLACKS, 2,468 (11.3 PERCENT) OTHER RACES, AND 2,343* (10.8* PERCENT) SPANISH-AMERICANS. THE TOTAL LABOR FORCE PARTICIPATION RATE WAS 59.9 PERCENT.
CIVILIAN EMPLOYMENT IN THE AREA TOTALED 20,723 WITH 18,012 (86.9 PERCENT) WHITES AT WORK, 310(1.5 PERCENT) BLACKS, 2,401 (11.6 PERCENT) OTHER RACES, AND 2,188* (10.6* PERCENT) SPANISH-AMERICANS. THE LARGEST NUMBER OF JOBS OCCURRED IN THE FOLLOWING FOUR MAJOR INDUSTRY DIVISIONS --

SERVICES
RETAIL TRADE
FIN, INS AND REAL ESTATE
MANUFACTURING

FEDERAL, STATE AND LOCAL GOVERNMENTS EMPLOYED 4,408 PERSONS IN NONAGRICULTURAL JOBS, 21.3 PERCENT OF THE TOTAL EMPLOYED IN THE AREA.

THE OCCUPATIONAL GROUPS EMPLOYING THE LARGEST NUMBER OF PERSONS IN EACH RACIAL AND ETHNIC GROUP WERE --

	ALL RACES	WHITE	BLACK	OTHER RACES	SPANISH-AMERICAN
TOTAL EMPLOYED, NUMBER	20,723	18,012	310	2,401	2,188*
HORIZONTAL PERCENT	100.0	86.9	1.5	11.6	10.6*
VERTICAL PERCENT	100.0	100.0	100.0	100.0	100.0
WHITE COLLAR WORKERS	68.6	68.8*	55.5*	68.7*	62.1*
BLUE COLLAR WORKERS	19.6*	20.1*	19.4*	16.0*	23.2*
SERVICE WORKERS	11.6*	10.9*	25.2*	15.2*	14.4*
FARM WORKERS	0.2	0.2	0.0	0.2	0.3*

TOTAL EMPLOYMENT IN LOW PAY AND LOW STATUS OCCUPATIONS WAS 7.6 PERCENT FOR WHITES, 18.1 PERCENT FOR BLACKS, 13.0 PERCENT FOR OTHER RACES, AND 11.5* PERCENT FOR SPANISH-AMERICANS.

UNEMPLOYMENT TOTALED 1,030 OR 4.7 PERCENT OF THE CIVILIAN LABOR FORCE. APRIL 1970 UNEMPLOYMENT RATES BY RACE/ETHNIC GROUPS WERE--WHITES, 5.0 PERCENT; BLACKS 6.1 PERCENT; OTHER RACES, 2.7 PERCENT; SPANISH-AMERICANS, 6.6* PERCENT. PERSONS OVER 16 YEARS OLD NOT IN THE ARMED FORCES, NOT AT WORK AND NOT LOOKING FOR WORK TOTALED 14,613. OF THESE 1.4 PERCENT WERE IN INSTITUTIONS AND 14.5 PERCENT WERE ENROLLED IN SCHOOL. THERE WERE 1,490* PERSONS IN THE AREA BETWEEN 16-64 YEARS OLD WHO WERE DISABLED OR HANDICAPPED.

INCOME AND POVERTY STATUS

DURING THE CALENDER YEAR 1969, ONE HALF OF THE FAMILIES IN THE AREA RECEIVED UNDER $11,846 PER YEAR. SOME 540 (4.4 PERCENT OF THE FAMILIES) RECEIVED LESS THAN THE POVERTY LEVEL WHILE 3,856 (31.7 PERCENT) RECEIVED MORE THAN $15,000. IN 1969, ONE HALF OF THE UNRELATED INDIVIDUALS RECEIVED LESS THAN $4,921; 1,608 (21.7 PERCENT OF THESE INDIVIDUALS) WERE BELOW THE POVERTY LEVEL, WHILE 242 (3.3 PERCENT) HAD INCOMES OVER $15,000.
MEDIAN WHITE FAMILY INCOME WAS $11,803 COMPARED WITH $9,366 FOR BLACKS, $12,728 FOR OTHER RACES, AND $11,993* FOR SPANISH-AMERICANS.

FAMILIES BELOW POVERTY RECEIVED A MEAN INCOME OF $1,338 IN 1969; 10.0 PERCENT OF THE POVERTY FAMILIES RECEIVED PUBLIC ASSISTANCE INCOME. OF THE POVERTY FAMILIES, 169 (31.3 PERCENT) WERE HEADED BY WOMEN.

THE TOTAL NUMBER OF PERSONS IN POVERTY WAS 3,133 (7.1 PERCENT OF ALL PERSONS).
THE 'NEAR POOR' PERSONS WITH INCOME LESS THAN 125 PERCENT OF THE POVERTY LEVEL TOTALED 4,253 (9.6 PERCENT OF ALL PERSONS) WHILE THE 'POOR POOR' PERSONS WITH INCOME LESS THAN 75 PERCENT OF THE POVERTY LEVEL NUMBERED 2,312 (5.2 PERCENT OF ALL PERSONS).

VETERANS

AMONG MALES 16 YEARS OLD AND OVER, 6,315 (38.9 PERCENT) WERE VETERANS. MEN WHO SERVED DURING THE VIETNAM WAR PERIOD NUMBERED 1,181; DURING THE KOREAN CONFLICT, 758. SOME 313 HAD SERVED IN BOTH KOREA AND WORLD WAR II.
SERVICE IN PREVIOUS PERIODS ACCOUNTED FOR 4,063 VETERANS.

EDUCATIONAL ATTAINMENT

OF THE TOTAL POPULATION OVER 25 YEARS OLD, 9,678 (32.3 PERCENT) HAD LESS THAN A HIGH SCHOOL EDUCATION. HOWEVER, 67.7 PERCENT HAD GRADUATED FROM HIGH SCHOOL AND 16.5 PERCENT WERE COLLEGE GRADUATES. ONE HALF OF THE WHITE POPULATION IN THIS AGE GROUP HAD AT LEAST 12.6 YEARS OF EDUCATION, COMPARED WITH 12.6 YEARS FOR BLACKS, 13.1 YEARS FOR OTHER RACES AND 12.8* YEARS FOR SPANISH-AMERICANS.

SCHOOL ENROLLMENT RATES FOR PERSONS 16-21 YEARS OLD WERE 62.8 PERCENT FOR THE WHITE POPULATION, 40.9* PERCENT FOR BLACKS, 81.6* PERCENT FOR OTHER RACES, AND 56.4* PERCENT FOR SPANISH-AMERICANS. OF THE POPULATION 16-21 YEARS OLD, SOME 1,354 (35.9 PERCENT) WERE NOT ENROLLED IN SCHOOL; OF THIS TOTAL 1,114 WERE HIGH SCHOOL GRADUATES AND 240 WERE SCHOOL DROPOUTS. ABOUT 33.9 PERCENT OF THE GRADUATES AND 57.9 PERCENT OF THE DROPOUTS WERE UNEMPLOYED OR NOT IN THE LABOR FORCE.

TABLE 1
POPULATION BY RACE, ETHNIC GROUP, SEX AND AGE
(SECOND COUNT DATA)1/

RACIAL GROUP

THE TOTAL POPULATION OF THIS AREA IN APRIL 1970 WAS 44,572 COMPOSED OF 5,693 (12.8 PERCENT) RACIAL MINORITIES (BLACK AND OTHER RACES) AND 38,879 (87.2 PERCENT WHITES. THE SPANISH-AMERICAN ETHNIC GROUP, WHICH CAN INCLUDE WHITES, BLACKS OR OTHER RACES, ACCOUNTED FOR 4,704* (10.6* PERCENT) OF THE POPULATION. THE AREA'S POPULATION INCLUDES THE FOLLOWING NUMBER OF MALES AND FEMALES IN EACH RACIAL GROUP -

	NUMBER			PERCENT DISTRIBUTION (VERTICAL)			PERCENT DISTRIBUTION (HORIZONTAL)		
RACIAL GROUP	TOTAL	MALE	FEMALE	TOTAL	MALE	FEMALE	TOTAL	MALE	FEMALE

SUMMARY MANPOWER INDICATORS

FOR

SAN FRANCISCO, DISTRICT 6
SUBDISTRICT D
PARKSIDE/ST. FRANCIS WOOD/
PARK MERCED

NOTE -- AN ASTERISK (*) FOLLOWING A DATA ITEM INDICATES A DISCLOSURE SUPPRESSION. THE BUREAU OF THE CENSUS DID NOT RELEASE DATA WHEN TOO FEW INDIVIDUALS WERE COUNTED IN A PARTICULAR CATEGORY IN ORDER TO PREVENT DISCLOSURE OF INFORMATION ABOUT INDIVIDUALS. THE SUPPRESSED DATA IS COUNTED AS ZERO WHEN USED IN CALCULATIONS. THE ASTERISK WILL APPEAR WHEN A SUPPRESSION OCCURRED IN ANY NUMBER USED IN THE CALCULATION OF THE ITEM. FOR EXAMPLE, WHERE A SUPPRESSION OCCURRED IN A TOTAL, ALL PERCENTAGES CALCULATED FROM THAT TOTAL WILL SHOW THE SUPPRESSION ASTERISK.

SPANISH AMERICAN -- IN 42 STATES AND DISTRICT OF COLUMBIA, THIS POPULATION IS IDENTIFIED AS -PERSONS OF SPANISH LANGUAGE-; IN FIVE SOUTHWESTERN STATES, AS -PERSONS OF SPANISH LANGUAGE OR SPANISH SURNAME-; AND IN THE MIDDLE ATLANTIC STATES, AS -PERSONS OF PUERTO RICAN BIRTH OR PARENTAGE-.

SPANISH AMERICANS ARE ALSO COUNTED IN THE RACIAL CATEGORIES AS WHITE, BLACK OR OTHER RACES.

The availability of data from the 1970 Census of Population on computer tapes provides Census users with unique opportunities to tailor output to individual requirements and to execute the statistical operations necessary to sharpen the analysis of economic and social conditions in the United States.

The Manpower Administration has taken full advantage of the opportunities presented by the 1970 Census and of computer technology by compiling a series of reports based on information contained in the second and fourth count summary tapes. These reports, which include much unpublished data, were prepared cooperatively by Federal, State, and local research personnel. They are specially geared to the informational needs of manpower program managers and staff specialists, manpower planners, and research workers in human resource programs. The use of computers permitted the creation of manpower profiles for administrative areas; thus, in addition to the usual geography--States, counties, cities, etc.--the reports in this series also include information on Department of Labor's administrative areas and those of State Employment Security agencies and other associated organizations.

The major reports prepared from the second and fourth count summary tapes are:

1. Summary Manpower Indicators
2. Detailed Manpower Indicators
3. Inter-Area Manpower Comparisons
4. Manpower Indicator Atlas

The reports were planned and written in the Manpower Administration, Region IX Data Systems and Reports Division, Walter Postle, Chief, in cooperation with staff of the Employment Security research and analysis staffs in Arizona, California, Hawaii, and Nevada.

Special thanks are due to Susan Holland, Economist in the Region IX-X Office of the Bureau of Labor Statistics, who prepared the bulk of the Summary Manpower Indicators report; to Bruce Bargmeyer, Manpower Development Specialist in the Region IX Data Systems and Reports Division, who worked tirelessly in bringing this project to completion; to William Grannell, Research Analyst in the California Department of Human Resources Development who made substantial contributions to the inter-area comparison report; to Susan Wisler, Manpower Economist in the Nevada Employment Security Department; to Richard Froncek of the Arizona Employment Security Commission and Fred Pang, Research Statistician in the Hawaii Department of Labor and Industrial Relations. Out thanks are also due to Carl Quong and his expert staff in the Applications Programming Group of the Lawrence Berkeley Laboratory, University of California, who prepared the computer programs for this project.

Manpower Profile — — April 1970	1
Tables 1 — 5 Demographic and Social Characteristics	
1. Population by Race, Ethnic Group, Sex and Age (Second Count Data)	3
2. Total Population by Age and Sex (numbers and percent distribution by age)	4
3. Spanish Indicators, Origin of Foreign Stock, Veteran Status, and Mobility	5
4. Living Arrangements	6
5. Educational Attainment and School Enrollment by Age, and Vocational Training of Men 16-64 Years Old	7
Tables 6 — 10 Employment Status and Composition of Employment	
6. Employment Status of Persons 16+, Total, Male, Female	8
7. Employment Status by School Completion for 16-21's and by Disability Status for 16-64's, by Sex	9
8. Weeks Worked in 1969 by Age and Sex (numbers and percent distribution)	10
9. Employed Persons 16+ by Occupation, Total, and Female (percent distribution)	11
10. Employed Persons 16+ by Industry and Class of Worker, Total and Female	12
Tables 11 — 14 Income and Poverty Indicators	
11. Income in 1969 of Families and Unrelated Individuals 14+	13
12. Type of Income in 1969 of Families and Unrelated Individuals 14+, and Ratio of Family Income to Poverty Level	14
13. Selected Poverty Indicators for Persons, Families, and Unrelated Individuals 14+	15
14. Median and Mean Income for Selected Occupational Groups, by Sex	16
Technical Notes	17

MANPOWER PROFILE

RACIAL AND ETHNIC CHARACTERISTICS

THE TOTAL POPULATION OF THE AREA IN APRIL 1970 WAS 64,249 WITH A RACIAL COMPOSITION OF WHITES, 59,397 (92.4 PERCENT); BLACKS, 751* (1.2* PERCENT); OTHER RACES, 4,101* (6.4* PERCENT). THE SPANISH AMERICAN ETHNIC GROUP (ALSO COUNTED PRIMARILY IN THE WHITE RACE, BUT INCLUDES SOME BLACKS AND OTHER RACES) ACCOUNTED FOR 5,001 (7.8 PERCENT OF THE POPULATION). PERSONS OF FOREIGN STOCK MADE UP 30,248 (47.1 PERCENT OF THE TOTAL POPULATION).

AGE

ONE HALF OF THE MALE WHITE POPULATION WAS BELOW 43.3 YEARS OLD, COMPARED WITH 24.6* YEARS FOR MALE BLACKS, 27.0* YEARS FOR MALES IN OTHER RACES, AND 32.2 YEARS FOR MALE SPANISH-AMERICANS. THE RESPECTIVE MEDIAN AGES FOR FEMALES WERE--WHITE 48.0 YEARS, BLACK 24.1* YEARS, OTHER RACES 29.6* YEARS AND SPANISH-AMERICANS 36.6 YEARS. SOME 40,773 (63.5 PERCENT OF THE TOTAL POPULATION) WERE IN THE PRIME WORKING AGE GROUP, 16 TO 64 YEARS OLD. PERSONS OVER 65 ACCOUNTED FOR 11,656 (18.1 PERCENT OF THE TOTAL POPULATION).

EMPLOYMENT AND UNEMPLOYMENT

THE CIVILIAN LABOR FORCE IN THIS AREA WAS 29,344 COMPRISED OF 27,026 (92.1 PERCENT) WHITES, 365* (1.2* PERCENT) BLACKS, 1,953* (6.7* PERCENT) OTHER RACES, AND 2,218 (7.6 PERCENT) SPANISH-AMERICANS. THE TOTAL LABOR FORCE PARTICIPATION RATE WAS 56.3 PERCENT.
CIVILIAN EMPLOYMENT IN THE AREA TOTALED 28,247 WITH 26,008 (92.1 PERCENT) WHITES AT WORK, 351*(1.2* PERCENT) BLACKS, 1,888* (6.7* PERCENT) OTHER RACES, AND 2,150 (7.6 PERCENT) SPANISH-AMERICANS. THE LARGEST NUMBER OF JOBS OCCURRED IN THE FOLLOWING FOUR MAJOR INDUSTRY DIVISIONS --

SERVICES
RETAIL TRADE
FIN, INS AND REAL ESTATE
MANUFACTURING

FEDERAL, STATE AND LOCAL GOVERNMENTS EMPLOYED 6,184 PERSONS IN NONAGRICULTURAL JOBS, 21.9 PERCENT OF THE TOTAL EMPLOYED IN THE AREA.

THE OCCUPATIONAL GROUPS EMPLOYING THE LARGEST NUMBER OF PERSONS IN EACH RACIAL AND ETHNIC GROUP WERE --

	ALL RACES	WHITE	BLACK	OTHER RACES	SPANISH-AMERICAN
TOTAL EMPLOYED, NUMBER	28,247	26,008	351*	1,888*	2,150
HORIZONTAL PERCENT	100.0	92.1	1.2*	6.7*	7.6
VERTICAL PERCENT	100.0	100.0	100.0	100.0	100.0
WHITE COLLAR WORKERS	72.0*	72.7*	58.7*	65.1*	63.7
BLUE COLLAR WORKERS	17.6*	17.5*	23.9*	18.9*	22.0*
SERVICE WORKERS	10.3*	9.8*	17.4*	16.0*	14.2*
FARM WORKERS	0.1	0.1	0.0*	0.0*	0.0

TOTAL EMPLOYMENT IN LOW PAY AND LOW STATUS OCCUPATIONS WAS 7.1 PERCENT FOR WHITES, 17.7* PERCENT FOR BLACKS, 15.3* PERCENT FOR OTHER RACES, AND 12.6 PERCENT FOR SPANISH-AMERICANS.

UNEMPLOYMENT TOTALED 1,097 OR 3.7 PERCENT OF THE CIVILIAN LABOR FORCE. APRIL 1970 UNEMPLOYMENT RATES BY RACE/ETHNIC GROUPS WERE--WHITES, 3.8 PERCENT; BLACKS 3.8* PERCENT; OTHER RACES, 3.3* PERCENT; SPANISH-AMERICANS, 3.1 PERCENT. PERSONS OVER 16 YEARS OLD NOT IN THE ARMED FORCES, NOT AT WORK AND NOT LOOKING FOR WORK TOTALED 22,936. OF THESE 0.7 PERCENT WERE IN INSTITUTIONS AND 15.9 PERCENT WERE ENROLLED IN SCHOOL. THERE WERE 1,711 PERSONS IN THE AREA BETWEEN 16-64 YEARS OLD WHO WERE DISABLED OR HANDICAPPED.

INCOME AND POVERTY STATUS

DURING THE CALENDER YEAR 1969, ONE HALF OF THE FAMILIES IN THE AREA RECEIVED UNDER $13,697 PER YEAR. SOME 704 (3.8 PERCENT OF THE FAMILIES) RECEIVED LESS THAN THE POVERTY LEVEL WHILE 7,899 (42.6 PERCENT) RECEIVED MORE THAN $15,000. IN 1969, ONE HALF OF THE UNRELATED INDIVIDUALS RECEIVED LESS THAN $4,619; 1,622 (22.4 PERCENT OF THESE INDIVIDUALS) WERE BELOW THE POVERTY LEVEL, WHILE 361 (4.6 PERCENT) HAD INCOMES OVER $15,000.
MEDIAN WHITE FAMILY INCOME WAS $13,716 COMPARED WITH $13,874* FOR BLACKS, $13,449* FOR OTHER RACES, AND $12,401 FOR SPANISH-AMERICANS.

FAMILIES BELOW POVERTY RECEIVED A MEAN INCOME OF $1,090 IN 1969; 5.1 PERCENT OF THE POVERTY FAMILIES RECEIVED PUBLIC ASSISTANCE INCOME. OF THE POVERTY FAMILIES, 201 (28.6 PERCENT) WERE HEADED BY WOMEN.

THE TOTAL NUMBER OF PERSONS IN POVERTY WAS 3,634 (5.7 PERCENT OF ALL PERSONS).
THE 'NEAR POOR' PERSONS WITH INCOME LESS THAN 125 PERCENT OF THE POVERTY LEVEL TOTALED 4,735 (7.5 PERCENT OF ALL PERSONS) WHILE THE 'POOR POOR' PERSONS WITH INCOME LESS THAN 75 PERCENT OF THE POVERTY LEVEL NUMBERED 2,801 (4.4 PERCENT OF ALL PERSONS).

VETERANS

AMONG MALES 16 YEARS OLD AND OVER, 10,068 (43.4 PERCENT) WERE VETERANS. MEN WHO SERVED DURING THE VIETNAM WAR PERIOD NUMBERED 1,290; DURING THE KOREAN CONFLICT, 1,169. SOME 520 HAD SERVED IN BOTH KOREA AND WORLD WAR II.
SERVICE IN PREVIOUS PERIODS ACCOUNTED FOR 7,089 VETERANS.

EDUCATIONAL ATTAINMENT

OF THE TOTAL POPULATION OVER 25 YEARS OLD, 11,555 (26.3 PERCENT) HAD LESS THAN A HIGH SCHOOL EDUCATION. HOWEVER, 73.7 PERCENT HAD GRADUATED FROM HIGH SCHOOL AND 19.2 PERCENT WERE COLLEGE GRADUATES. ONE HALF OF THE WHITE POPULATION IN THIS AGE GROUP HAD AT LEAST 12.8 YEARS OF EDUCATION, COMPARED WITH 12.4* YEARS FOR BLACKS, 13.2* YEARS FOR OTHER RACES AND 12.8 YEARS FOR SPANISH-AMERICANS.

SCHOOL ENROLLMENT RATES FOR PERSONS 16-21 YEARS OLD WERE 77.2 PERCENT FOR THE WHITE POPULATION, 66.7* PERCENT FOR BLACKS, 81.2* PERCENT FOR OTHER RACES, AND 77.6 PERCENT FOR SPANISH-AMERICANS. OF THE POPULATION 16-21 YEARS OLD, SOME 1,382 (23.0 PERCENT) WERE NOT ENROLLED IN SCHOOL; OF THIS TOTAL 1,069 WERE HIGH SCHOOL GRADUATES AND 313 WERE SCHOOL DROPOUTS. ABOUT 28.3 PERCENT OF THE GRADUATES AND 60.1 PERCENT OF THE DROPOUTS WERE UNEMPLOYED OR NOT IN THE LABOR FORCE.

TABLE 1
POPULATION BY RACE, ETHNIC GROUP, SEX AND AGE
(SECOND COUNT DATA)1/

RACIAL GROUP

THE TOTAL POPULATION OF THIS AREA IN APRIL 1970 WAS 64,220 COMPOSED OF 4,588 (7.1 PERCENT) RACIAL MINORITIES (BLACK AND OTHER RACES) AND 59,632 (92.9 PERCENT WHITES. THE SPANISH-AMERICAN ETHNIC GROUP, WHICH CAN INCLUDE WHITES, BLACKS OR OTHER RACES, ACCOUNTED FOR 5,001 (7.8 PERCENT) OF THE POPULATION. THE AREA'S POPULATION INCLUDES THE FOLLOWING NUMBER OF MALES AND FEMALES IN EACH RACIAL GROUP -

	NUMBER			PERCENT DISTRIBUTION (VERTICAL)			PERCENT DISTRIBUTION (HORIZONTAL)		
RACIAL GROUP	TOTAL	MALE	FEMALE	TOTAL	MALE	FEMALE	TOTAL	MALE	FEMALE
TOTAL ALL RACES	64,220	29,214	35,006	100.0	100.0	100.0	100.0	45.5	54.5

FOR

SAN FRANCISCO, DISTRICT 6
SUBDISTRICT E
PARNASSUS HTS./FOREST HILL/
DIAMOND HTS./SUNNY SIDE

NOTE -- AN ASTERISK (*) FOLLOWING A DATA ITEM INDICATES A DISCLOSURE SUPPRESSION. THE BUREAU OF THE CENSUS DID NOT RELEASE DATA WHEN TOO FEW INDIVIDUALS WERE COUNTED IN A PARTICULAR CATEGORY IN ORDER TO PREVENT DISCLOSURE OF INFORMATION ABOUT INDIVIDUALS. THE SUPPRESSED DATA IS COUNTED AS ZERO WHEN USED IN CALCULATIONS. THE ASTERISK WILL APPEAR WHEN A SUPPRESSION OCCURRED IN ANY NUMBER USED IN THE CALCULATION OF THE ITEM. FOR EXAMPLE, WHERE A SUPPRESSION OCCURRED IN A TOTAL, ALL PERCENTAGES CALCULATED FROM THAT TOTAL WILL SHOW THE SUPPRESSION ASTERISK.

SPANISH AMERICAN -- IN 42 STATES AND DISTRICT OF COLUMBIA, THIS POPULATION IS IDENTIFIED AS -PERSONS OF SPANISH LANGUAGE-; IN FIVE SOUTHWESTERN STATES, AS -PERSONS OF SPANISH LANGUAGE OR SPANISH SURNAME-; AND IN THE MIDDLE ATLANTIC STATES, AS -PERSONS OF PUERTO RICAN BIRTH OR PARENTAGE-.

SPANISH AMERICANS ARE ALSO COUNTED IN THE RACIAL CATEGORIES AS WHITE, BLACK OR OTHER RACES.

The availability of data from the 1970 Census of Population on computer tapes provides Census users with unique opportunities to tailor output to individual requirements and to execute the statistical operations necessary to sharpen the analysis of economic and social conditions in the United States.

The Manpower Administration has taken full advantage of the opportunities presented by the 1970 Census and of computer technology by compiling a series of reports based on information contained in the second and fourth count summary tapes. These reports, which include much unpublished data, were prepared cooperatively by Federal, State, and local research personnel. They are specially geared to the informational needs of manpower program managers and staff specialists, manpower planners, and research workers in human resource programs. The use of computers permitted the creation of manpower profiles for administrative areas; thus, in addition to the usual geography--States, counties, cities, etc.--the reports in this series also include information on Department of Labor's administrative areas and those of State Employment Security agencies and other associated organizations.

The major reports prepared from the second and fourth count summary tapes are:

1. Summary Manpower Indicators
2. Detailed Manpower Indicators
3. Inter-Area Manpower Comparisons
4. Manpower Indicator Atlas

The reports were planned and written in the Manpower Administration, Region IX Data Systems and Reports Division, Walter Postle, Chief, in cooperation with staff of the Employment Security research and analysis staffs in Arizona, California, Hawaii, and Nevada.

Special thanks are due to Susan Holland, Economist in the Region IX-X Office of the Bureau of Labor Statistics, who prepared the bulk of the Summary Manpower Indicators report; to Bruce Bargmeyer, Manpower Development Specialist in the Region IX Data Systems and Reports Division, who worked tirelessly in bringing this project to completion; to William Grannell, Research Analyst in the California Department of Human Resources Development who made substantial contributions to the inter-area comparison report; to Susan Wisler, Manpower Economist in the Nevada Employment Security Department; to Richard Froncek of the Arizona Employment Security Commission and Fred Pang, Research Statistician in the Hawaii Department of Labor and Industrial Relations. Out thanks are also due to Carl Quong and his expert staff in the Applications Programming Group of the Lawrence Berkeley Laboratory, University of California, who prepared the computer programs for this project.

MANPOWER PROFILE

SAN FRANCISCO, DISTRICT 6
SUBDISTRICT E
PARNASSUS HTS./FOREST HILL/
DIAMOND HTS./SUNNY SIDE

RACIAL AND ETHNIC CHARACTERISTICS

THE TOTAL POPULATION OF THE AREA IN APRIL 1970 WAS 51,950 WITH A RACIAL COMPOSITION OF WHITES, 45,443 (87.5 PERCENT); BLACKS, 2,287* (4.4* PERCENT); OTHER RACES, 4,220* (8.1* PERCENT). THE SPANISH AMERICAN ETHNIC GROUP (ALSO COUNTED PRIMARILY IN THE WHITE RACE, BUT INCLUDES SOME BLACKS AND OTHER RACES) ACCOUNTED FOR 7,360 (14.2 PERCENT OF THE POPULATION). PERSONS OF FOREIGN STOCK MADE UP 21,089 (40.6 PERCENT OF THE TOTAL POPULATION).

AGE

ONE HALF OF THE MALE WHITE POPULATION WAS BELOW 33.8 YEARS OLD, COMPARED WITH 30.1* YEARS FOR MALE BLACKS, 29.0* YEARS FOR MALES IN OTHER RACES, AND 26.3 YEARS FOR MALE SPANISH-AMERICANS. THE RESPECTIVE MEDIAN AGES FOR FEMALES WERE--WHITE 35.6 YEARS, BLACK 27.5* YEARS, OTHER RACES 26.4* YEARS AND SPANISH-AMERICANS 26.7 YEARS. SOME 35,895 (69.1 PERCENT OF THE TOTAL POPULATION) WERE IN THE PRIME WORKING AGE GROUP, 16 TO 64 YEARS OLD. PERSONS OVER 65 ACCOUNTED FOR 6,248 (12.0 PERCENT OF THE TOTAL POPULATION).

EMPLOYMENT AND UNEMPLOYMENT

THE CIVILIAN LABOR FORCE IN THIS AREA WAS 26,425 COMPRISED OF 23,287 (88.1 PERCENT) WHITES, 1,129* (4.3* PERCENT) BLACKS, 2,009* (7.6* PERCENT) OTHER RACES, AND 3,117 (11.8 PERCENT) SPANISH-AMERICANS. THE TOTAL LABOR FORCE PARTICIPATION RATE WAS 62.9 PERCENT.
CIVILIAN EMPLOYMENT IN THE AREA TOTALED 25,309 WITH 22,263 (88.0 PERCENT) WHITES AT WORK, 1,069*(4.2* PERCENT) BLACKS, 1,977* (7.8* PERCENT) OTHER RACES, AND 2,971 (11.7 PERCENT) SPANISH-AMERICANS. THE LARGEST NUMBER OF JOBS OCCURRED IN THE FOLLOWING FOUR MAJOR INDUSTRY DIVISIONS --

SERVICES
RETAIL TRADE
FIN, INS AND REAL ESTATE
MANUFACTURING

FEDERAL, STATE AND LOCAL GOVERNMENTS EMPLOYED 6,057 PERSONS IN NONAGRICULTURAL JOBS, 23.9 PERCENT OF THE TOTAL EMPLOYED IN THE AREA.

THE OCCUPATIONAL GROUPS EMPLOYING THE LARGEST NUMBER OF PERSONS IN EACH RACIAL AND ETHNIC GROUP WERE --

	ALL RACES	WHITE	BLACK	OTHER RACES	SPANISH-AMERICAN
TOTAL EMPLOYED, NUMBER	25,309	22,263	1,069*	1,977*	2,971
HORIZONTAL PERCENT	100.0	88.0	4.2*	7.8*	11.7
VERTICAL PERCENT	100.0	100.0	100.0	100.0	100.0
WHITE COLLAR WORKERS	71.9*	72.8	54.3*	72.1*	53.1*
BLUE COLLAR WORKERS	17.7	18.0*	20.4*	13.7*	34.4*
SERVICE WORKERS	10.2*	9.2*	23.1*	14.2*	12.4*
FARM WORKERS	0.1	0.1	2.2*	0.0*	0.0

TOTAL EMPLOYMENT IN LOW PAY AND LOW STATUS OCCUPATIONS WAS 6.0 PERCENT FOR WHITES, 17.9* PERCENT FOR BLACKS, 13.1* PERCENT FOR OTHER RACES, AND 10.0 PERCENT FOR SPANISH-AMERICANS.

UNEMPLOYMENT TOTALED 1,116 OR 4.2 PERCENT OF THE CIVILIAN LABOR FORCE. APRIL 1970 UNEMPLOYMENT RATES BY RACE/ETHNIC GROUPS WERE--WHITES, 4.4 PERCENT; BLACKS 5.3* PERCENT; OTHER RACES, 1.6* PERCENT; SPANISH-AMERICANS, 4.7 PERCENT. PERSONS OVER 16 YEARS OLD NOT IN THE ARMED FORCES, NOT AT WORK AND NOT LOOKING FOR WORK TOTALED 15,614. OF THESE 9.4 PERCENT WERE IN INSTITUTIONS AND 18.6 PERCENT WERE ENROLLED IN SCHOOL. THERE WERE 1,518 PERSONS IN THE AREA BETWEEN 16-64 YEARS OLD WHO WERE DISABLED OR HANDICAPPED.

INCOME AND POVERTY STATUS

DURING THE CALENDER YEAR 1969, ONE HALF OF THE FAMILIES IN THE AREA RECEIVED UNDER $12,824 PER YEAR. SOME 652 (5.2 PERCENT OF THE FAMILIES) RECEIVED LESS THAN THE POVERTY LEVEL WHILE 4,762 (37.7 PERCENT) RECEIVED MORE THAN $15,000. IN 1969, ONE HALF OF THE UNRELATED INDIVIDUALS RECEIVED LESS THAN $5,857; 1,926 (17.7 PERCENT OF THESE INDIVIDUALS) WERE BELOW THE POVERTY LEVEL, WHILE 650 (5.8 PERCENT) HAD INCOMES OVER $15,000. MEDIAN WHITE FAMILY INCOME WAS $12,822 COMPARED WITH $11,754* FOR BLACKS, $13,556* FOR OTHER RACES, AND $10,490 FOR SPANISH-AMERICANS.

FAMILIES BELOW POVERTY RECEIVED A MEAN INCOME OF $1,790 IN 1969; 17.9 PERCENT OF THE POVERTY FAMILIES RECEIVED PUBLIC ASSISTANCE INCOME. OF THE POVERTY FAMILIES, 172 (26.4 PERCENT) WERE HEADED BY WOMEN.

THE TOTAL NUMBER OF PERSONS IN POVERTY WAS 4,085 (8.2 PERCENT OF ALL PERSONS). THE 'NEAR POOR' PERSONS WITH INCOME LESS THAN 125 PERCENT OF THE POVERTY LEVEL TOTALED 5,536 (11.1 PERCENT OF ALL PERSONS) WHILE THE 'POOR POOR' PERSONS WITH INCOME LESS THAN 75 PERCENT OF THE POVERTY LEVEL NUMBERED 2,775 (5.5 PERCENT OF ALL PERSONS).

VETERANS

AMONG MALES 16 YEARS OLD AND OVER, 9,310 (46.1 PERCENT) WERE VETERANS. MEN WHO SERVED DURING THE VIETNAM WAR PERIOD NUMBERED 1,571; DURING THE KOREAN CONFLICT, 1,370. SOME 341 HAD SERVED IN BOTH KOREA AND WORLD WAR II. SERVICE IN PREVIOUS PERIODS ACCOUNTED FOR 6,028 VETERANS.

EDUCATIONAL ATTAINMENT

OF THE TOTAL POPULATION OVER 25 YEARS OLD, 9,302 (27.1 PERCENT) HAD LESS THAN A HIGH SCHOOL EDUCATION. HOWEVER, 72.9 PERCENT HAD GRADUATED FROM HIGH SCHOOL AND 24.3 PERCENT WERE COLLEGE GRADUATES. ONE HALF OF THE WHITE POPULATION IN THIS AGE GROUP HAD AT LEAST 12.9 YEARS OF EDUCATION, COMPARED WITH 12.5* YEARS FOR BLACKS, 13.6* YEARS FOR OTHER RACES AND 12.7 YEARS FOR SPANISH-AMERICANS.

SCHOOL ENROLLMENT RATES FOR PERSONS 16-21 YEARS OLD WERE 65.5 PERCENT FOR THE WHITE POPULATION, 63.2* PERCENT FOR BLACKS, 90.6* PERCENT FOR OTHER RACES, AND 61.9 PERCENT FOR SPANISH-AMERICANS. OF THE POPULATION 16-21 YEARS OLD, SOME 1,482 (35.0 PERCENT) WERE NOT ENROLLED IN SCHOOL; OF THIS TOTAL 1,110 WERE HIGH SCHOOL GRADUATES AND 372 WERE SCHOOL DROPOUTS. ABOUT 35.4 PERCENT OF THE GRADUATES AND 67.2 PERCENT OF THE DROPOUTS WERE UNEMPLOYED OR NOT IN THE LABOR FORCE.

TABLE 1
POPULATION BY RACE, ETHNIC GROUP, SEX AND AGE
(SECOND COUNT DATA)1/

RACIAL GROUP

THE TOTAL POPULATION OF THIS AREA IN APRIL 1970 WAS 51,871 COMPOSED OF 6,599 (12.7 PERCENT) RACIAL MINORITIES (BLACK AND OTHER RACES) AND 45,272 (87.3 PERCENT WHITES. THE SPANISH-AMERICAN ETHNIC GROUP, WHICH CAN INCLUDE WHITES, BLACKS OR OTHER RACES, ACCOUNTED FOR 7,360 (14.2 PERCENT) OF THE POPULATION. THE AREA'S POPULATION INCLUDES THE FOLLOWING NUMBER OF MALES AND FEMALES IN EACH RACIAL GROUP -

	NUMBER			PERCENT DISTRIBUTION (VERTICAL)			PERCENT DISTRIBUTION (HORIZONTAL)		
RACIAL GROUP	TOTAL	MALE	FEMALE	TOTAL	MALE	FEMALE	TOTAL	MALE	FEMALE
TOTAL ALL RACES	51,871	25,274	26,597	100.0	100.0	100.0	100.0	48.7	51.3
WHITE	45,272	22,061	23,211	87.3	87.3	87.3	100.0	48.7	51.3

SUMMARY MANPOWER INDICATORS

FOR

SAN FRANCISCO, DISTRICT 6
SUBDISTRICT F
EXCELSIOR/MISSION TERRACE

NOTE -- AN ASTERISK (*) FOLLOWING A DATA ITEM INDICATES A DISCLOSURE SUPPRESSION. THE BUREAU OF THE CENSUS DID NOT RELEASE DATA WHEN TOO FEW INDIVIDUALS WERE COUNTED IN A PARTICULAR CATEGORY IN ORDER TO PREVENT DISCLOSURE OF INFORMATION ABOUT INDIVIDUALS. THE SUPPRESSED DATA IS COUNTED AS ZERO WHEN USED IN CALCULATIONS. THE ASTERISK WILL APPEAR WHEN A SUPPRESSION OCCURRED IN ANY NUMBER USED IN THE CALCULATION OF THE ITEM. FOR EXAMPLE, WHERE A SUPPRESSION OCCURRED IN A TOTAL, ALL PERCENTAGES CALCULATED FROM THAT TOTAL WILL SHOW THE SUPPRESSION ASTERISK.

SPANISH AMERICAN -- IN 42 STATES AND DISTRICT OF COLUMBIA, THIS POPULATION IS IDENTIFIED AS -PERSONS OF SPANISH LANGUAGE-; IN FIVE SOUTHWESTERN STATES, AS -PERSONS OF SPANISH LANGUAGE OR SPANISH SURNAME-; AND IN THE MIDDLE ATLANTIC STATES, AS -PERSONS OF PUERTO RICAN BIRTH OR PARENTAGE-.

SPANISH AMERICANS ARE ALSO COUNTED IN THE RACIAL CATEGORIES AS WHITE, BLACK OR OTHER RACES.

The availability of data from the 1970 Census of Population on computer tapes provides Census users with unique opportunities to tailor output to individual requirements and to execute the statistical operations necessary to sharpen the analysis of economic and social conditions in the United States.

The Manpower Administration has taken full advantage of the opportunities presented by the 1970 Census and of computer technology by compiling a series of reports based on information contained in the second and fourth count summary tapes. These reports, which include much unpublished data, were prepared cooperatively by Federal, State, and local research personnel. They are specially geared to the informational needs of manpower program managers and staff specialists, manpower planners, and research workers in human resource programs. The use of computers permitted the creation of manpower profiles for administrative areas; thus, in addition to the usual geography--States, counties, cities, etc.--the reports in this series also include information on Department of Labor's administrative areas and those of State Employment Security agencies and other associated organizations.

The major reports prepared from the second and fourth count summary tapes are:

1. Summary Manpower Indicators
2. Detailed Manpower Indicators
3. Inter-Area Manpower Comparisons
4. Manpower Indicator Atlas

The reports were planned and written in the Manpower Administration, Region IX Data Systems and Reports Division, Walter Postle, Chief, in cooperation with staff of the Employment Security research and analysis staffs in Arizona, California, Hawaii, and Nevada.

Special thanks are due to Susan Holland, Economist in the Region IX-X Office of the Bureau of Labor Statistics, who prepared the bulk of the Summary Manpower Indicators report; to Bruce Bargmeyer, Manpower Development Specialist in the Region IX Data Systems and Reports Division, who worked tirelessly in bringing this project to completion; to William Grannell, Research Analyst in the California Department of Human Resources Development who made substantial contributions to the inter-area comparison report; to Susan Wisler, Manpower Economist in the Nevada Employment Security Department; to Richard Froncek of the Arizona Employment Security Commission and Fred Pang, Research Statistician in the Hawaii Department of Labor and Industrial Relations. Out thanks are also due to Carl Quong and his expert staff in the Applications Programming Group of the Lawrence Berkeley Laboratory, University of California, who prepared the computer programs for this project.

MANPOWER PROFILE

SAN FRANCISCO, DISTRICT 6
SUBDISTRICT F
EXCELSIOR/MISSION TERRACE

RACIAL AND ETHNIC CHARACTERISTICS

THE TOTAL POPULATION OF THE AREA IN APRIL 1970 WAS 39,173 WITH A RACIAL COMPOSITION OF WHITES, 34,008 (86.8 PERCENT); BLACKS, 1,372 (3.5 PERCENT); OTHER RACES, 3,793 (9.7 PERCENT). THE SPANISH AMERICAN ETHNIC GROUP (ALSO COUNTED PRIMARILY IN THE WHITE RACE, BUT INCLUDES SOME BLACKS AND OTHER RACES) ACCOUNTED FOR 10,987 (28.0 PERCENT OF THE POPULATION). PERSONS OF FOREIGN STOCK MADE UP 20,659 (52.7 PERCENT OF THE TOTAL POPULATION).

AGE

ONE HALF OF THE MALE WHITE POPULATION WAS BELOW 36.3 YEARS OLD, COMPARED WITH 28.5 YEARS FOR MALE BLACKS, 24.9 YEARS FOR MALES IN OTHER RACES, AND 25.8 YEARS FOR MALE SPANISH-AMERICANS. THE RESPECTIVE MEDIAN AGES FOR FEMALES WERE--WHITE 41.8 YEARS, BLACK 25.7 YEARS, OTHER RACES 23.3 YEARS AND SPANISH-AMERICANS 26.9 YEARS. SOME 24,189 (61.7 PERCENT OF THE TOTAL POPULATION) WERE IN THE PRIME WORKING AGE GROUP, 16 TO 64 YEARS OLD. PERSONS OVER 65 ACCOUNTED FOR 5,768 (14.7 PERCENT OF THE TOTAL POPULATION).

EMPLOYMENT AND UNEMPLOYMENT

THE CIVILIAN LABOR FORCE IN THIS AREA WAS 16,635 COMPRISED OF 14,539 (87.4 PERCENT) WHITES, 587 (3.5 PERCENT) BLACKS, 1,509 (9.1 PERCENT) OTHER RACES, AND 4,595 (27.6 PERCENT) SPANISH-AMERICANS. THE TOTAL LABOR FORCE PARTICIPATION RATE WAS 55.7 PERCENT.
CIVILIAN EMPLOYMENT IN THE AREA TOTALED 15,670 WITH 13,668 (87.2 PERCENT) WHITES AT WORK, 571(3.6 PERCENT) BLACKS, 1,431 (9.1 PERCENT) OTHER RACES, AND 4,336 (27.7 PERCENT) SPANISH-AMERICANS. THE LARGEST NUMBER OF JOBS OCCURRED IN THE FOLLOWING FOUR MAJOR INDUSTRY DIVISIONS --

SERVICES
MANUFACTURING
RETAIL TRADE
PUBLIC ADMINISTRATION

FEDERAL, STATE AND LOCAL GOVERNMENTS EMPLOYED 3,055 PERSONS IN NONAGRICULTURAL JOBS, 19.5 PERCENT OF THE TOTAL EMPLOYED IN THE AREA.

THE OCCUPATIONAL GROUPS EMPLOYING THE LARGEST NUMBER OF PERSONS IN EACH RACIAL AND ETHNIC GROUP WERE --

	ALL RACES	WHITE	BLACK	OTHER RACES	SPANISH-AMERICAN
TOTAL EMPLOYED, NUMBER	15,670	13,668	571	1,431	4,336
HORIZONTAL PERCENT	100.0	87.2	3.6	9.1	27.7
VERTICAL PERCENT	100.0	100.0	100.0	100.0	100.0
WHITE COLLAR WORKERS	46.6*	46.3*	42.7*	50.7*	41.8*
BLUE COLLAR WORKERS	38.1*	39.2	39.1	27.4*	41.4*
SERVICE WORKERS	14.9*	14.1*	17.3*	21.6*	16.7*
FARM WORKERS	0.4	0.4	0.9	0.3	0.2

TOTAL EMPLOYMENT IN LOW PAY AND LOW STATUS OCCUPATIONS WAS 13.1 PERCENT FOR WHITES, 14.7 PERCENT FOR BLACKS, 17.4 PERCENT FOR OTHER RACES, AND 15.8 PERCENT FOR SPANISH-AMERICANS.

UNEMPLOYMENT TOTALED 965 OR 5.8 PERCENT OF THE CIVILIAN LABOR FORCE. APRIL 1970 UNEMPLOYMENT RATES BY RACE/ETHNIC GROUPS WERE--WHITES, 6.0 PERCENT; BLACKS 2.7 PERCENT; OTHER RACES, 5.2 PERCENT; SPANISH-AMERICANS, 5.6 PERCENT. PERSONS OVER 16 YEARS OLD NOT IN THE ARMED FORCES, NOT AT WORK AND NOT LOOKING FOR WORK TOTALED 13,266. OF THESE 2.1 PERCENT WERE IN INSTITUTIONS AND 13.2 PERCENT WERE ENROLLED IN SCHOOL. THERE WERE 1,781 PERSONS IN THE AREA BETWEEN 16-64 YEARS OLD WHO WERE DISABLED OR HANDICAPPED.

INCOME AND POVERTY STATUS

DURING THE CALENDER YEAR 1969, ONE HALF OF THE FAMILIES IN THE AREA RECEIVED UNDER $10,864 PER YEAR. SOME 892 (8.5 PERCENT OF THE FAMILIES) RECEIVED LESS THAN THE POVERTY LEVEL WHILE 2,605 (24.8 PERCENT) RECEIVED MORE THAN $15,000. IN 1969, ONE HALF OF THE UNRELATED INDIVIDUALS RECEIVED LESS THAN $2,869; 1,301 (33.0 PERCENT OF THESE INDIVIDUALS) WERE BELOW THE POVERTY LEVEL, WHILE 64 (1.6 PERCENT) HAD INCOMES OVER $15,000. MEDIAN WHITE FAMILY INCOME WAS $10,805 COMPARED WITH $9,951 FOR BLACKS, $12,132 FOR OTHER RACES, AND $10,921 FOR SPANISH-AMERICANS.

FAMILIES BELOW POVERTY RECEIVED A MEAN INCOME OF $1,708 IN 1969; 15.7 PERCENT OF THE POVERTY FAMILIES RECEIVED PUBLIC ASSISTANCE INCOME. OF THE POVERTY FAMILIES, 274 (30.7 PERCENT) WERE HEADED BY WOMEN.

THE TOTAL NUMBER OF PERSONS IN POVERTY WAS 4,504 (11.6 PERCENT OF ALL PERSONS). THE 'NEAR POOR' PERSONS WITH INCOME LESS THAN 125 PERCENT OF THE POVERTY LEVEL TOTALED 5,698 (14.6 PERCENT OF ALL PERSONS) WHILE THE 'POOR POOR' PERSONS WITH INCOME LESS THAN 75 PERCENT OF THE POVERTY LEVEL NUMBERED 2,972 (7.6 PERCENT OF ALL PERSONS).

VETERANS

AMONG MALES 16 YEARS OLD AND OVER, 5,989 (42.9 PERCENT) WERE VETERANS. MEN WHO SERVED DURING THE VIETNAM WAR PERIOD NUMBERED 959; DURING THE KOREAN CONFLICT, 804. SOME 198 HAD SERVED IN BOTH KOREA AND WORLD WAR II. SERVICE IN PREVIOUS PERIODS ACCOUNTED FOR 4,028 VETERANS.

EDUCATIONAL ATTAINMENT

OF THE TOTAL POPULATION OVER 25 YEARS OLD, 12,997 (52.7 PERCENT) HAD LESS THAN A HIGH SCHOOL EDUCATION. HOWEVER, 47.3 PERCENT HAD GRADUATED FROM HIGH SCHOOL AND 5.8 PERCENT WERE COLLEGE GRADUATES. ONE HALF OF THE WHITE POPULATION IN THIS AGE GROUP HAD AT LEAST 11.6 YEARS OF EDUCATION, COMPARED WITH 11.6 YEARS FOR BLACKS, 12.4 YEARS FOR OTHER RACES AND 12.1 YEARS FOR SPANISH-AMERICANS.

SCHOOL ENROLLMENT RATES FOR PERSONS 16-21 YEARS OLD WERE 59.5 PERCENT FOR THE WHITE POPULATION, 59.6 PERCENT FOR BLACKS, 78.3 PERCENT FOR OTHER RACES, AND 60.8 PERCENT FOR SPANISH-AMERICANS. OF THE POPULATION 16-21 YEARS OLD, SOME 1,382 (38.9 PERCENT) WERE NOT ENROLLED IN SCHOOL; OF THIS TOTAL 1,007 WERE HIGH SCHOOL GRADUATES AND 375 WERE SCHOOL DROPOUTS. ABOUT 30.0 PERCENT OF THE GRADUATES AND 66.4 PERCENT OF THE DROPOUTS WERE UNEMPLOYED OR NOT IN THE LABOR FORCE.

TABLE 1
POPULATION BY RACE, ETHNIC GROUP, SEX AND AGE
(SECOND COUNT DATA)1/

RACIAL GROUP

THE TOTAL POPULATION OF THIS AREA IN APRIL 1970 WAS 39,388 COMPOSED OF 5,792 (14.7 PERCENT) RACIAL MINORITIES (BLACK AND OTHER RACES) AND 33,596 (85.3 PERCENT WHITES. THE SPANISH-AMERICAN ETHNIC GROUP, WHICH CAN INCLUDE WHITES, BLACKS OR OTHER RACES, ACCOUNTED FOR 10,987 (27.9 PERCENT) OF THE POPULATION. THE AREA'S POPULATION INCLUDES THE FOLLOWING NUMBER OF MALES AND FEMALES IN EACH RACIAL GROUP -

	NUMBER			PERCENT DISTRIBUTION (VERTICAL)			PERCENT DISTRIBUTION (HORIZONTAL)		
RACIAL GROUP	TOTAL	MALE	FEMALE	TOTAL	MALE	FEMALE	TOTAL	MALE	FEMALE

FOR

SAN FRANCISCO, DISTRICT 6
SUBDISTRICT G
EXCELSIOR/CAYVGA PARK/
PORTOLA/CROCKER-AMAZON

NOTE -- AN ASTERISK (*) FOLLOWING A DATA ITEM INDICATES A DISCLOSURE SUPPRESSION. THE BUREAU OF THE CENSUS DID NOT RELEASE DATA WHEN TOO FEW INDIVIDUALS WERE COUNTED IN A PARTICULAR CATEGORY IN ORDER TO PREVENT DISCLOSURE OF INFORMATION ABOUT INDIVIDUALS. THE SUPPRESSED DATA IS COUNTED AS ZERO WHEN USED IN CALCULATIONS. THE ASTERISK WILL APPEAR WHEN A SUPPRESSION OCCURRED IN ANY NUMBER USED IN THE CALCULATION OF THE ITEM. FOR EXAMPLE, WHERE A SUPPRESSION OCCURRED IN A TOTAL, ALL PERCENTAGES CALCULATED FROM THAT TOTAL WILL SHOW THE SUPPRESSION ASTERISK.

SPANISH AMERICAN -- IN 42 STATES AND DISTRICT OF COLUMBIA, THIS POPULATION IS IDENTIFIED AS -PERSONS OF SPANISH LANGUAGE-; IN FIVE SOUTHWESTERN STATES, AS -PERSONS OF SPANISH LANGUAGE OR SPANISH SURNAME-; AND IN THE MIDDLE ATLANTIC STATES, AS -PERSONS OF PUERTO RICAN BIRTH OR PARENTAGE-.

SPANISH AMERICANS ARE ALSO COUNTED IN THE RACIAL CATEGORIES AS WHITE, BLACK OR OTHER RACES.

The availability of data from the 1970 Census of Population on computer tapes provides Census users with unique opportunities to tailor output to individual requirements and to execute the statistical operations necessary to sharpen the analysis of economic and social conditions in the United States.

The Manpower Administration has taken full advantage of the opportunities presented by the 1970 Census and of computer technology by compiling a series of reports based on information contained in the second and fourth count summary tapes. These reports, which include much unpublished data, were prepared cooperatively by Federal, State, and local research personnel. They are specially geared to the informational needs of manpower program managers and staff specialists, manpower planners, and research workers in human resource programs. The use of computers permitted the creation of manpower profiles for administrative areas; thus, in addition to the usual geography--States, counties, cities, etc.——the reports in this series also include information on Department of Labor's administrative areas and those of State Employment Security agencies and other associated organizations.

The major reports prepared from the second and fourth count summary tapes are:

1. Summary Manpower Indicators
2. Detailed Manpower Indicators
3. Inter-Area Manpower Comparisons
4. Manpower Indicator Atlas

The reports were planned and written in the Manpower Administration, Region IX Data Systems and Reports Division, Walter Postle, Chief, in cooperation with staff of the Employment Security research and analysis staffs in Arizona, California, Hawaii, and Nevada.

Special thanks are due to Susan Holland, Economist in the Region IX-X Office of the Bureau of Labor Statistics, who prepared the bulk of the Summary Manpower Indicators report; to Bruce Bargmeyer, Manpower Development Specialist in the Region IX Data Systems and Reports Division, who worked tirelessly in bringing this project to completion; to William Grannell, Research Analyst in the California Department of Human Resources Development who made substantial contributions to the inter-area comparison report; to Susan Wisler, Manpower Economist in the Nevada Employment Security Department; to Richard Froncek of the Arizona Employment Security Commission and Fred Pang, Research Statistician in the Hawaii Department of Labor and Industrial Relations. Out thanks are also due to Carl Quong and his expert staff in the Applications Programming Group of the Lawrence Berkeley Laboratory, University of California, who prepared the computer programs for this project.

MANPOWER PROFILE

SAN FRANCISCO, DISTRICT 6
SUBDISTRICT G
EXCELSIOR/CAYVGA PARK/
PORTOLA/CROCKER-AMAZON

RACIAL AND ETHNIC CHARACTERISTICS

THE TOTAL POPULATION OF THE AREA IN APRIL 1970 WAS 59,606 WITH A RACIAL COMPOSITION OF WHITES, 46,336 (77.7 PERCENT); BLACKS, 7,629 (12.8 PERCENT); OTHER RACES, 5,641 (9.5 PERCENT). THE SPANISH AMERICAN ETHNIC GROUP (ALSO COUNTED PRIMARILY IN THE WHITE RACE, BUT INCLUDES SOME BLACKS AND OTHER RACES) ACCOUNTED FOR 14,371 (24.1 PERCENT OF THE POPULATION). PERSONS OF FOREIGN STOCK MADE UP 29,073 (48.8 PERCENT OF THE TOTAL POPULATION).

AGE

ONE HALF OF THE MALE WHITE POPULATION WAS BELOW 37.2 YEARS OLD, COMPARED WITH 26.0 YEARS FOR MALE BLACKS, 25.5 YEARS FOR MALES IN OTHER RACES, AND 25.9 YEARS FOR MALE SPANISH-AMERICANS. THE RESPECTIVE MEDIAN AGES FOR FEMALES WERE--WHITE 41.9 YEARS, BLACK 26.4 YEARS, OTHER RACES 23.0 YEARS AND SPANISH-AMERICANS 27.3 YEARS. SOME 37,355 (62.7 PERCENT OF THE TOTAL POPULATION) WERE IN THE PRIME WORKING AGE GROUP, 16 TO 64 YEARS OLD. PERSONS OVER 65 ACCOUNTED FOR 7,925 (13.3 PERCENT OF THE TOTAL POPULATION).

EMPLOYMENT AND UNEMPLOYMENT

THE CIVILIAN LABOR FORCE IN THIS AREA WAS 26,128 COMPRISED OF 20,348 (77.9 PERCENT) WHITES, 3,445 (13.2 PERCENT) BLACKS, 2,335 (8.9 PERCENT) OTHER RACES, AND 6,048 (23.1 PERCENT) SPANISH-AMERICANS. THE TOTAL LABOR FORCE PARTICIPATION RATE WAS 57.9 PERCENT.
CIVILIAN EMPLOYMENT IN THE AREA TOTALED 24,623 WITH 19,176 (77.9 PERCENT) WHITES AT WORK, 3,242(13.2 PERCENT) BLACKS, 2,205 (9.0 PERCENT) OTHER RACES, AND 5,673 (23.0 PERCENT) SPANISH-AMERICANS. THE LARGEST NUMBER OF JOBS OCCURRED IN THE FOLLOWING FOUR MAJOR INDUSTRY DIVISIONS --

SERVICES
MANUFACTURING
RETAIL TRADE
PUBLIC ADMINISTRATION

FEDERAL, STATE AND LOCAL GOVERNMENTS EMPLOYED 5,193 PERSONS IN NONAGRICULTURAL JOBS, 21.1 PERCENT OF THE TOTAL EMPLOYED IN THE AREA.

THE OCCUPATIONAL GROUPS EMPLOYING THE LARGEST NUMBER OF PERSONS IN EACH RACIAL AND ETHNIC GROUP WERE --

	ALL RACES	WHITE	BLACK	OTHER RACES	SPANISH-AMERICAN
TOTAL EMPLOYED, NUMBER	24,623	19,176	3,242	2,205	5,673
HORIZONTAL PERCENT	100.0	77.9	13.2	9.0	23.0
VERTICAL PERCENT	100.0	100.0	100.0	100.0	100.0
WHITE COLLAR WORKERS	46.3*	47.4*	37.1*	50.6*	42.6*
BLUE COLLAR WORKERS	37.3	38.9*	33.7	29.2*	40.8*
SERVICE WORKERS	16.0*	13.4*	28.5*	20.0*	16.3*
FARM WORKERS	0.3	0.3	0.7	0.2	0.3

TOTAL EMPLOYMENT IN LOW PAY AND LOW STATUS OCCUPATIONS WAS 12.4 PERCENT FOR WHITES, 26.2 PERCENT FOR BLACKS, 17.1 PERCENT FOR OTHER RACES, AND 16.6 PERCENT FOR SPANISH-AMERICANS.

UNEMPLOYMENT TOTALED 1,505 OR 5.8 PERCENT OF THE CIVILIAN LABOR FORCE. APRIL 1970 UNEMPLOYMENT RATES BY RACE/ETHNIC GROUPS WERE--WHITES, 5.8 PERCENT; BLACKS 5.9 PERCENT; OTHER RACES, 5.6 PERCENT; SPANISH-AMERICANS, 6.2 PERCENT. PERSONS OVER 16 YEARS OLD NOT IN THE ARMED FORCES, NOT AT WORK AND NOT LOOKING FOR WORK TOTALED 19,085. OF THESE 2.0 PERCENT WERE IN INSTITUTIONS AND 14.7 PERCENT WERE ENROLLED IN SCHOOL. THERE WERE 2,220 PERSONS IN THE AREA BETWEEN 16-64 YEARS OLD WHO WERE DISABLED OR HANDICAPPED.

INCOME AND POVERTY STATUS

DURING THE CALENDER YEAR 1969, ONE HALF OF THE FAMILIES IN THE AREA RECEIVED UNDER $10,962 PER YEAR. SOME 1,192 (7.5 PERCENT OF THE FAMILIES) RECEIVED LESS THAN THE POVERTY LEVEL WHILE 3,999 (25.2 PERCENT) RECEIVED MORE THAN $15,000. IN 1969, ONE HALF OF THE UNRELATED INDIVIDUALS RECEIVED LESS THAN $2,941; 1,892 (32.7 PERCENT OF THESE INDIVIDUALS) WERE BELOW THE POVERTY LEVEL, WHILE 90 (1.5 PERCENT) HAD INCOMES OVER $15,000.
MEDIAN WHITE FAMILY INCOME WAS $10,930 COMPARED WITH $10,796 FOR BLACKS, $11,577 FOR OTHER RACES, AND $10,774 FOR SPANISH-AMERICANS.

FAMILIES BELOW POVERTY RECEIVED A MEAN INCOME OF $1,742 IN 1969; 19.1 PERCENT OF THE POVERTY FAMILIES RECEIVED PUBLIC ASSISTANCE INCOME. OF THE POVERTY FAMILIES, 384 (32.2 PERCENT) WERE HEADED BY WOMEN.

THE TOTAL NUMBER OF PERSONS IN POVERTY WAS 6,188 (10.5 PERCENT OF ALL PERSONS).
THE 'NEAR POOR' PERSONS WITH INCOME LESS THAN 125 PERCENT OF THE POVERTY LEVEL TOTALED 8,171 (13.8 PERCENT OF ALL PERSONS) WHILE THE 'POOR POOR' PERSONS WITH INCOME LESS THAN 75 PERCENT OF THE POVERTY LEVEL NUMBERED 4,090 (6.9 PERCENT OF ALL PERSONS).

VETERANS

AMONG MALES 16 YEARS OLD AND OVER, 8,894 (41.9 PERCENT) WERE VETERANS. MEN WHO SERVED DURING THE VIETNAM WAR PERIOD NUMBERED 1,518; DURING THE KOREAN CONFLICT, 1,256. SOME 297 HAD SERVED IN BOTH KOREA AND WORLD WAR II.
SERVICE IN PREVIOUS PERIODS ACCOUNTED FOR 5,823 VETERANS.

EDUCATIONAL ATTAINMENT

OF THE TOTAL POPULATION OVER 25 YEARS OLD, 19,462 (52.9 PERCENT) HAD LESS THAN A HIGH SCHOOL EDUCATION. HOWEVER, 47.1 PERCENT HAD GRADUATED FROM HIGH SCHOOL AND 5.4 PERCENT WERE COLLEGE GRADUATES. ONE HALF OF THE WHITE POPULATION IN THIS AGE GROUP HAD AT LEAST 11.4 YEARS OF EDUCATION, COMPARED WITH 11.7 YEARS FOR BLACKS, 12.3 YEARS FOR OTHER RACES AND 12.0 YEARS FOR SPANISH-AMERICANS.

SCHOOL ENROLLMENT RATES FOR PERSONS 16-21 YEARS OLD WERE 60.9 PERCENT FOR THE WHITE POPULATION, 54.8 PERCENT FOR BLACKS, 77.4 PERCENT FOR OTHER RACES, AND 58.1 PERCENT FOR SPANISH-AMERICANS. OF THE POPULATION 16-21 YEARS OLD, SOME 2,323 (39.2 PERCENT) WERE NOT ENROLLED IN SCHOOL; OF THIS TOTAL 1,692 WERE HIGH SCHOOL GRADUATES AND 631 WERE SCHOOL DROPOUTS. ABOUT 28.7 PERCENT OF THE GRADUATES AND 65.8 PERCENT OF THE DROPOUTS WERE UNEMPLOYED OR NOT IN THE LABOR FORCE.

TABLE 1
POPULATION BY RACE, ETHNIC GROUP, SEX AND AGE
(SECOND COUNT DATA)1/

RACIAL GROUP

THE TOTAL POPULATION OF THIS AREA IN APRIL 1970 WAS 59,700 COMPOSED OF 13,787 (23.1 PERCENT) RACIAL MINORITIES (BLACK AND OTHER RACES) AND 45,913 (76.9 PERCENT WHITES. THE SPANISH-AMERICAN ETHNIC GROUP, WHICH CAN INCLUDE WHITES, BLACKS OR OTHER RACES, ACCOUNTED FOR 14,371 (24.1 PERCENT) OF THE POPULATION. THE AREA'S POPULATION INCLUDES THE FOLLOWING NUMBER OF MALES AND FEMALES IN EACH RACIAL GROUP -

	NUMBER			PERCENT DISTRIBUTION (VERTICAL)			PERCENT DISTRIBUTION (HORIZONTAL)		
RACIAL GROUP	TOTAL	MALE	FEMALE	TOTAL	MALE	FEMALE	TOTAL	MALE	FEMALE
TOTAL ALL RACES	59,700	28,338	31,362	100.0	100.0	100.0	100.0	47.5	52.5
WHITE	45,913	21,600	24,313	76.9	76.2	77.5	100.0	47.0	53.0

USUAL PLACE OF RESIDENCE

In accordance with census practice dating back to 1790, each person enumerated in the 1970 census was counted as an inhabitant of his usual place of residence, which is generally construed to mean the place where he lives and sleeps most of the time. This place is not necessarily the same as his legal residence, voting residence, or domicile. In the vast majority of cases, however, the use of these different bases of classification would produce substantially the same statistics, although there may be appreciable differences for a few areas.

The implementation of this practice has resulted in the establishing of residence rules for certain categories of persons whose usual place of residence is not immediately clear. Furthermore, this practice means that persons were not always counted as residents of the place where they happened to be found by the census enumerators. Persons without a usual place of residence were, however, counted where they were enumerated.

Members of the Armed Forces living on military installations were counted, as in every previous census, as residents of the area in which the installation was located. Similarly, members of the Armed Forces not living on a military installation were counted as residents of the area in which they were living. Crews of U.S. Navy vessels were counted as residents of the home port to which the particular vessel was assigned; crews of vessels deployed to the overseas fleet were therefore not included in the population of any State or the District of Columbia. Persons in Armed Forces families were counted where they were living on Census Day (e.g., the military installation, "off-base," or elsewhere, as the case might be).

Crews of U.S. merchant marine vessels were counted as part of the population of the U.S. port in which their vessel was berthed on Census Day; or if sailing in inland or coastal waters, as part of the population of the vessel's home port. Crews of all other U.S. merchant marine vessels are not included in the population of any State or the District of Columbia.

College students, as in 1950 and 1960, were counted as residents of the area in which they were living while attending college. Inmates of institutions, who ordinarily live there for considerable periods of time, were counted as residents of the area where this institution was located; on the other hand, patients in general hospitals, who ordinarily remain for short periods of time, were counted at their homes. On the night of April 6, 1970, a special enumeration was conducted in missions, flophouses, detention centers, etc., and persons enumerated therein were counted as residents of the particular place.

Americans who were overseas for an extended period (in the Armed Forces, working at civilian jobs, studying in foreign universities, etc.) are not included in the population of any of the States or the District of Columbia. On the other hand, persons temporarily abroad on vacations, business trips, and the like, were counted at their usual residence.

Persons in larger hotels, motels, etc., on the night of March 31, 1970, were requested to fill out a census form for allocation back to their homes if they indicated no one was there to report them in the census. A similar approach was used for persons visiting in private residences, as well as for Americans who left the United States during March 1970 via major intercontinental air or ship carriers for temporary travel abroad.

In addition, information on persons away from their usual place of residence was obtained from other members of their families, landladies, etc. If an entire family was expected to be away during the whole period of the enumeration, information on it was obtained from neighbors. A matching process was used to eliminate duplicate reports for a person who reported for himself while away from his usual residence and who was also reported at this usual residence by someone else.

URBAN AND RURAL RESIDENCE

Definition.—The urban population comprises all persons living in urbanized areas and in places of 2,500 inhabitants or more outside urbanized areas. More specifically, the urban population consists of all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, villages, boroughs (except Alaska), and towns (except in the New England States, New York, and Wisconsin), but excluding those persons living in the rural portions of extended cities; (b)

unincorporated places of 2,500 inhabitants or more; and (c) other territory, incorporated or unincorporated, included in urbanized areas. The population not classified as urban constitutes the rural population. Information on the historical development of the urban and rural definition appears in the PC(1)-A reports.

Extended cities.—Over the 1960-1970 decade there has been an increasing trend toward the extension of city boundaries to include territory essentially rural in character. Examples are city-county consolidations such as the creation of the city of Chesapeake, Va., from South Norfolk City and Norfolk County and the extension of Oklahoma City, Okla., into five counties. The classification of all the inhabitants of such cities as urban would include in the urban population persons whose environment is primarily rural in character. In order to separate these people from those residing in the closely settled portions of such cities, the Bureau of the Census examined patterns of population density and classified a portion or portions of each such city as rural. An extended city contains one or more areas, each of at least 5 square miles in extent and with a population density of less than 100 persons per square mile according to the 1970 census. The area or areas constitute at least 25 percent of the land area of the legal city or total 25 square miles or more.

These cities—designated as extended cities—thus consist of an urban part and a rural part. When an extended city is a central city of an urbanized area or a standard metropolitan statistical area; only the urban part is considered as the central city. If the extended city is shown separately under the area, the city name is followed by the term "urban part." In tables in which the city name is not followed by this term, the population figure shown is for the entire city.

Farm and nonfarm residence.—The rural population is subdivided into the rural-farm population, which comprises all rural residents living on farms, and the rural-nonfarm population, which comprises the remaining rural population. As in the 1960 census, the farm population consists of persons living on places of 10 or more acres from which sales of farm products amounted to $50 or more in the preceding calendar year or on places of less than 10 acres from which sales of farm products amounted to $250 or more in the preceding year.

Farm residence in accordance with this definition was determined from answers to questions H17 and H18, asked of households in the 20-percent sample (see facsimiles of questionnaire items and instructions, pages App-37 and 39).

Persons in rural territory who did not meet the definition for the rural-farm population were classified as nonfarm residents. Persons living in group quarters on institutional grounds or in summer camps or motels were also classified as nonfarm.

Farm and nonfarm residence has been obtained in each census since that of 1930. For 1970, as in the 1960 census, the figures are for the farm population residing in rural territory. In all other censuses, farm residence was obtained in cities and other territory classified as urban.

COUNTIES

The primary divisions of the States are, in general, termed counties, but in Louisiana these divisions are known as parishes. There are no counties in Alaska. In this State, data are shown for statistical areas which are county equivalents designated as census divisions; they were developed for general statistical purposes through the cooperation of the State and the Census Bureau. In four States (Maryland, Missouri, Nevada, and Virginia), there are one or more cities which are independent of any county organization and thus constitute primary divisions of their States.

MINOR CIVIL DIVISIONS (TOWNS)

Minor civil divisions are the primary political or administrative subdivisions of counties established by State law. In the New England States, there is considerably more interest in these subdivisions than is generally true elsewhere. Therefore, the reports for the New England States contain statistics for these areas (which are designated as "towns") in the tables which present data for places; the towns are interspersed with the same alphabetical order as the places and are identified by the term "town" after the name. Population information on all county subdivisions appears in the PC(1)-A and PC(1)-B reports.

PLACES

Two types of places are recognized in the census reports—incorporated places and unincorporated places, as defined below.

Incorporated places.—These are political units incorporated as cities, boroughs, towns, and villages with the following exceptions (a) boroughs in Alaska and (b) towns in the New England States, New York, and Wisconsin. Boroughs in Alaska are treated as county subdivisions and may include one or more incorporated places. The towns in the New England States, New York, and Wisconsin are minor civil divisions similar to the townships found in other States and not necessarily thickly settled centers

of population such as the cities, boroughs, towns, and villages in other States. Similarly, in New Jersey and Pennsylvania, where some townships possess powers and functions similar to those of incorporated places, the townships are not classified as "incorporated places." Thus, some minor civil divisions which are "incorporated" in one legal sense of the word are not regarded by the Census Bureau as "incorporated places." Without this restriction all of the towns in the New England States, New York, and Wisconsin and the townships in New Jersey and Pennsylvania would have to be counted as incorporated places without any consideration of the nature of population settlement. The densely settled portions of some are recognized as unincorporated places or as part of an urbanized area.

In Hawaii, there are no incorporated places in the sense of a functioning local governmental unit. The State, however, has recognized places and established boundaries for them. Such places are treated as incorporated in the 1970 census.

The population figure for an incorporated place at earlier censuses applies to the area of the place at the time of the given census. Hence, the indicated change in population over the decade reflects the effect of any annexations or detachments. In order to permit an analysis of the relative importance of population growth within the old boundaries and of population added in annexed territory, table 8 for incorporated places of 2,000 inhabitants or more in 1960 has been included in the PC(1)-A reports. No data are available on detachments from incorporated places.

Unincorporated places.—As in the 1950 and 1960 censuses, the Census Bureau has delineated boundaries for closely settled population centers without corporate limits. Each place so delineated possesses a definite nucleus of residences and has its boundaries drawn to include, if feasible, all the surrounding closely settled area. Outside urbanized areas, those unincorporated places with a population of 1,000 or more are presented in the census reports in the same manner as incorporated places of equal size. Within urbanized areas, unincorporated places are shown only if they have 5,000 inhabitants or more and there was an expression of local interest in their recognition.

Unincorporated places are identified with the letter "U." Unincorporated place boundaries change with changes in the settlement pattern; a place which has the same name in 1970 as in previous decades does not necessarily have the same boundaries. Information on modifications in the delineation of unincorporated places introduced in the 1970 census appears in the PC(1)-A reports.

URBANIZED AREAS

The major objective of the Census Bureau in delineating urbanized areas is to provide a better separation of urban and rural population in the vicinity of the larger cities. An urbanized area consists of a central city, or cities, and surrounding closely settled territory. The specific criteria for the delineation of an urbanized area are as follows:

1a. A central city of 50,000 inhabitants or more in 1960, in a special census conducted by the Census Bureau since 1960, or in the 1970 census; or

b. Twin cities, i.e., cities with contiguous boundaries and constituting, for general social and economic purposes, a single community with a combined population of at least 50,000, and with the smaller of the twin cities having a population of at least 15,000.

2. Surrounding closely settled territory, including the following (but excluding the rural portions of extended cities, see "urban and rural residence," above):

a. Incorporated places of 2,500 inhabitants or more.

b. Incorporated places with fewer than 2,500 inhabitants, provided that each has a closely settled area of 100 housing units or more.

c. Small parcels of land normally less than one square mile in area having a population density of 1,000 inhabitants or more per square mile. The areas of large nonresidential tracts devoted to such urban land uses as railroad yards, airports, factories, parks, golf courses, and cemeteries are excluded in computing the population density.

d. Other similar small areas in unincorporated territory with lower population density provided that they serve
   - —to eliminate enclaves, or
   - —to close indentations in the urbanized areas of one mile or less across the open end, or
   - —to link outlying enumeration districts of qualifying density that are not more than 1½ miles from the main body of the urbanized area.

The 1970 criteria are essentially the same as those used in 1960 with two exceptions. The extended city concept is new for 1970. Secondly, in 1960, towns in the New England States, townships in New Jersey and Pennsylvania, and counties elsewhere, which

were classified as urban in accordance with specific criteria, were included in the contiguous urbanized areas. In 1970, only those portions of towns and townships in these States that met the rules followed in defining urbanized areas elsewhere in the United States are included.

All persons residing in an urbanized area are classified as urban. The urbanized area population is sometimes divided into those in the "central city (or cities)" and those in the remainder of the area or the "urban fringe." The "central city" category consists of the population of the cities named in the title of the urbanized area.[1] The title is limited to three names and normally lists the largest city first and the other qualifying cities in size order; this order is, in many cases based on 1960 population because most names were fixed before the 1970 counts were available. For the other cities to be listed in the title, they must have (a) 250,000 inhabitants or more or (b) at least one-third the population of the largest city and a population of 25,000 or more (except in the case of the small twin cities).

There is generally one urbanized area in each standard metropolitan statistical area. Sometimes, however, there are two because there exists another qualifying city with 50,000 inhabitants or more whose surrounding urban fringe is separated from the urban fringe of the larger central city or cities. (The Chicago metropolitan area has three urbanized areas.) In other cases, a single urbanized area covers portions of two or more standard metropolitan statistical areas. One metropolitan area (New London-Groton-Norwich, Conn.) has no urbanized area. A map of each urbanized area in this State appears in the PC(1)-A report for the State.

[1]The four exceptions are:
- New York, N.Y.-Northwestern New Jersey—New York, Newark, Jersey City, Paterson, Clifton, and Passaic
- Chicago, Ill.-Northwestern Indiana—Chicago, Gary, Hammond, and East Chicago
- Los Angeles-Long Beach—Los Angeles, Long Beach, Anaheim, Santa Ana, and Garden Grove
- San Francisco-Oakland—San Francisco, Oakland, and Vallejo

STANDARD METROPOLITAN STATISTICAL AREAS

The Bureau of the Census recognizes 247 standard metropolitan statistical areas (SMSA's) in the 1970 census. These include the 231 SMSA's as defined and named in the Bureau of the Budget publication, Standard Metropolitan Statistical Areas: 1967, U.S. Government Printing Office, Washington, D.C. 20402. Also included are 16 SMSA's as defined by the Office of Management and Budget, of which two were defined in January 1968 and an additional 14 were defined on the basis of the results of the 1970 census.

Except in the New England States, a standard metropolitan statistical area is a county or group of contiguous counties which contains at least one city of 50,000 inhabitants or more, or "twin cities" with a combined population of at least 50,000. In addition to the county, or counties, containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are socially and economically integrated with the central city. In a few cities where portions of counties outside the SMSA as defined in 1967 were annexed to the central city, the population living in those counties is not considered part of the central city. In the New England States, SMSA's consist of towns and cities instead of counties. Each SMSA must include at least one central city, and the complete title of an SMSA identifies the central city or cities. For a detailed description of the criteria used in defining SMSA's, see the Bureau of the Budget publication cited above.

The population living in SMSA's is designated as the metropolitan population. The population is subdivided as "inside central city or cities" and "outside central city or cities." The population living outside SMSA's constitutes the nonmetropolitan population.

STANDARD CONSOLIDATED AREAS

In view of the special importance of the metropolitan complexes around New York and Chicago, the Nation's two largest cities, several contiguous SMSA's and additional counties that do not appear to meet the formal integration criteria but do have strong interrelationships of other kinds have been combined into the New York-Northeastern New Jersey and the Chicago-Northwestern Indiana Standard Consolidated Areas, respectively. The former consists of Middlesex and Somerset Counties in New Jersey and the following SMSA's: New York, Newark, Jersey City, and Paterson-Clifton-Passaic. The latter consists of the following SMSA's: Chicago and Gary-Hammond-East Chicago.

SOCIAL CHARACTERISTICS

AGE

The data on age were derived from answers to questions 5, 6, and 7, which were asked of all persons (see facsimilies of questionnaire items and instructions on page App-33). Only the information in items 6 and 7 was read into the computer. Answers in item 5, which was not FOSDIC readable, were used during field review to fill any blanks in items 6 and 7. The age classification is based on the age of the person in completed years as of April 1, 1970. The data on age represent the difference, as calculated in the computer, between date of birth and April 1, 1970.

Median age.—The median age is that age which divides the distribution into two equal parts, one half being older than the median age and one half younger. When the median falls in the terminal category of an age distribution, the method of presentation is to show the initial age of the terminal category followed by a plus sign; thus, if the median falls in the category "75 years and over," it is shown as "75+."

Assignment of unknown ages.—In each census since 1940 the Bureau of the Census has estimated the age of a person when it was not reported. In censuses before 1940, with the exception of 1880, persons of unknown age were shown as a separate category. The summary totals for "14 years and over" and "21 years and over" for earlier censuses included all persons of "unknown age" since there is evidence that most of the persons for whom age was not reported were in the age classes above these limits. In 1960 and 1970 assignment of unknown ages was performed by the procedure described in the section below on "Accuracy of the Data."

RACE

The data on race were derived from answers to question 4, which was asked of all persons (see facsimile of questionnaire item on page App-33). The concept of race as used by the Bureau of the Census does not denote clear-cut scientific definitions of biological stock. Rather it reflects self-identification by respondents. Since the 1970 census obtained information on race primarily through self-enumeration, the data represent essentially self-classification by people according to the race with which they identify themselves.

For persons of mixed parentage who were in doubt as to their classification, the race of the person's father was used. In 1960, persons who reported mixed parentage of white and any other race were classified according to the other race; mixtures of races other than white were classified according to the race of the father.

The category "white" includes persons who indicated their race as white, as well as persons who did not classify themselves in one of the specific race categories on the questionnaire but entered Mexican, Puerto Rican, or a response suggesting Indo-European stock.

The category "Negro" includes persons who indicated their race as Negro or Black, as well as persons who did not classify themselves in one of the specific race categories on the questionnaire but who had such entries as Jamaican, Trinidadian, West Indian, Haitian, and Ethiopian. The term "Negro and other races" includes persons of all races other than white.

If the race entry was missing on the questionnaire for a member of a household, an answer was assigned in the computer according to the race of other household members, using specific rules of precedence of relationship. If race was not entered for anyone in the household, the race of the head of the preceding household

was assigned. This procedure is a variation of the general allocation process described in the section on "Accuracy of the Data."

For some areas, the statistics on race published in this report may differ significantly from those published in the Series PC(1)-B report because of the effect of the manual editing of the sample questionnaires. Many persons who reported their race as "Other" also supplied a write-in entry that indicated the proper race classification should have been one of the specific race categories, e.g., white or Negro. Although the field edit procedures included a review of such entries, there is evidence that the field review was sometimes incomplete. Consequently, the subsequent manual processing of the sample questionnaires resulted in changes in distributions by race, the most apparent being a reduction in the number of persons of "Other" race.

NATIVITY, PLACE OF BIRTH, AND PARENTAGE

The data on nativity, place of birth, and parentage were derived from answers to questions 13, 14, and 15 (see facsimiles of questionnaire items and instructions on pages App-34 and 38).

Nativity

The question on place of birth was asked of all persons in the 20-percent sample. The questions on parentage were asked of persons in the 15-percent sample. Information on place of birth is used to classify the population of the United States into two major categories: native and foreign born. The category "native" comprises persons born in the United States, the Commonwealth of Puerto Rico, or an outlying area of the United States or at sea. Also included in this category is the small number of persons who, although they were born in a foreign country, have at least one native American parent. When information on place of birth was missing, nativity was assigned on the basis of related information. In previous censuses, persons for whom nativity was not reported were generally classified as native. Persons not classified as native are classified as "foreign born." The population of the United States has been classified as native or foreign born in every census since 1850.

Place of Birth

Native.—Data on the State of birth of the native population have been collected in each census beginning with that of 1850. For the more recent censuses, State of birth has been published for the native population of the urban, rural-nonfarm, and rural-farm parts of States, and of individual cities above a specified minimum size. In this report, the native population is further classified into the following four groups: persons born in the State in which they were residing at the time of the census; persons born in a different State; persons born abroad of American parents, or at sea or in an outlying area of the United States; and persons whose State of birth was not reported. Respondents were instructed to report place of birth in terms of the mother's usual State of residence at the time of the birth rather than in terms of the location of the hospital if the birth occurred in a hospital. More detailed classifications of the native population of each State, by area of birth, are presented in the Detailed Characteristics reports (PC(1)-D).

The statistics on State of birth are of value mainly for the information they provide on the historic movements of the native population from one State to another within the United States from the time of birth to the date of the census. The statistics afford no indication of the amount of migration within a given State; nor do they take any account of intermediate moves between the time of a person's birth and the time of the census.

Foreign born.—Foreign-born persons were asked to report their country of birth according to international boundaries as recognized by the United States government on April 1, 1970. Since numerous changes in boundaries have occurred, some foreign-born persons may have reported their country of birth in terms of boundaries that existed at the time of their birth or emigration, or in accordance with their own national preference. A more detailed classification of country of origin of the foreign stock by nativity is presented in Series PC(1)-D, Detailed Characteristics reports.

Foreign Stock

The category "foreign stock" includes the foreign-born population and the native population of foreign or mixed parentage. Persons of foreign stock thus comprise all first- and second-generation Americans. In this report, persons of foreign stock are classified according to their country or origin.

MOTHER TONGUE

Definition

The data on mother tongue were derived from answers to question 17 (see facsimiles of questionnaire item

and instructions, pages App-34 and 38). The question related to the language spoken in the person's home when he was a child and was asked of all persons in the 15-percent sample. Information on mother tongue is used to assist in the identification of the various ethnic groups in the population. In particular, the Spanish language population is defined primarily on this basis. Statistics on mother tongue are also employed to identify geographic areas of the United States which have a high proportion of children living in households where English is not the major language. The data on mother tongue may not reflect a person's current language skills since the vast majority of persons reporting a mother tongue other than English have learned to speak English during or after their childhood.

Comparability

Before the 1960 census, a question on mother tongue was asked in the censuses of 1910, 1920, 1930, and 1940. The comparability of these data is limited to some extent by changes in question wording, in the categories of the population to whom the question was addressed, and in the detail that was published. In the 1910 and 1920 censuses, statistics on mother tongue were published for the foreign white stock; in 1930, they were published for the foreign-born white population; and in 1940, they were published for the native white of native parentage as well as the foreign white stock. In 1960, the data on mother tongue were shown for the foreign-born population of all races combined. In 1970, they are shown for all persons. In 1960 and 1970, if both English and another mother tongue were reported, preference was always given to the language other than English. This procedure may reduce somewhat the proportion of the foreign-born population classified as having English as their mother tongue.

SPANISH HERITAGE

In this report, social and economic characteristics are presented for the population of Spanish heritage, which is identified in various ways, using information derived from the 15-percent sample. In 42 States and the District of Columbia, this population is identified as "Persons of Spanish language;" in five Southwestern States, as "Persons of Spanish language or Spanish surname;" and in the three Middle Atlantic States, as "Persons of Puerto Rican birth or parentage." The specific definitions involved in identifying these population groups are given below. The statistics on disability, vocational training, and marital history shown in tables 51 to 53 in the columns for the above-mentioned populations, refer to persons of Spanish origin or descent (see definition below) because those items were collected on a 5-percent sample and, therefore, cannot be cross-tabulated with 15-percent information.

Spanish language.—Persons of Spanish language comprise persons of Spanish mother tongue and all other persons in families in which the head or wife reported Spanish as his or her mother tongue.

Spanish surname.—In five Southwestern States (Arizona, California, Colorado, New Mexico, and Texas) persons with Spanish surnames were identified by means of a list of over 8,000 Spanish surnames originally compiled by the Immigration and Naturalization Service[1] (and later updated by the Bureau of the Census). In the five Southwestern States social and economic characteristics are presented for persons of Spanish language combined with all other persons of Spanish surname. The number of these additional persons is shown in the category "Other persons of Spanish surname."

Puerto Rican birth or parentage.—The population of Puerto Rican birth or parentage includes persons born in Puerto Rico and persons born in the United States or an outlying area with one or both parents born in Puerto Rico. Social and economic characteristics are shown for this group in the reports for New York, New Jersey, and Pennsylvania.

Spanish origin or descent.—The data on Spanish origin or descent were derived from answers to question 13b, which appeared on the 5-percent sample questionnaire (see facsimile of questionnaire item, page App-34). The question was used to identify persons of Spanish origin or descent for tabulations of 5-percent items.

YEAR MOVED INTO PRESENT HOUSE

The data on year moved into present residence were derived from the answers to question 18 (see facsimiles of questionnaire item and instructions, pages App-34 and 38).

The question was asked of all persons in the 15-percent sample. As in 1960, respondents were asked to answer in terms of the most recent

[1] U.S. Immigration and Naturalization Service, Supplement to Manual of Immigration, Spanish—Spanish Personal Names, selected by Inspector George Lockwood, New York, 1936.

move they had made. The intent was to obtain the year when the person established his usual residence in the housing unit. Thus, a person who had moved back into the same house (or apartment) in which he had previously lived was asked to give the date at which he began the present occupancy. If a person had moved from one apartment to another in the same building, he was expected to give the year when he moved into the present apartment. The category "always lived in this house or apartment" consists of persons who reported that their residence on April 1, 1970, was the same as their residence at birth and who had never had any other place of residence.

RESIDENCE IN 1965

The data on residence in 1965 were derived from the answers to question 19 (see facsimiles of questionnaire item and instructions, pages App-34 and 38).

The questions were asked of all persons in the 15-percent sample. Residence on April 1, 1965, is the usual place of residence 5 years before enumeration. Residence in 1965 was used in conjunction with residence in 1970 to determine the extent of residential mobility of the population. The category "same house" includes all persons 5 years old and over who did not move during the 5 years as well as those who had moved but by 1970 had returned to their 1965 residence.

Persons who had changed residence from 1965 to 1970 were classified into groups according to type of move. The category "different house in United States" includes persons who, on April 1, 1965, lived in the United States in a different house from the one they occupied on April 1, 1970, and for whom sufficient information concerning the 1965 residence was collected. These persons were subdivided into three groups according to their 1965 residence: "different house, same county," "different county, same State," and "different State." The second and third groups comprise the population classified as "migrants." The category "abroad" includes those with residence in a foreign country or an outlying area of the United States in 1965. Persons 5 years old and over who had indicated they had moved into their present residence after April 1, 1965, but for whom sufficiently complete and consistent information regarding residence on April 1, 1965, was not collected, are included in the group "moved, 1965 residence not reported."

The number of persons who were living in a different house in 1965 is somewhat less than the total number of moves during the 5 years. Some persons in the same house at the two dates had moved during the 5-year period but by the time of enumeration had returned to their 1965 residence. Other persons who were living in a different house had made two or more intermediate moves.

Similar questions on mobility were asked in the 1960, 1950, and 1940 censuses. The questions in the 1950 census, however, applied to residence one year earlier rather than 5 years earlier. Although the questions in the 1940 census covered a 5-year period, comparability with that census is reduced somewhat because of different definitions and categories of tabulation. Only limited data appear in this report. Additional statistics on mobility are shown in the Detailed Characteristics reports (PC(1)-D).

SCHOOL ENROLLMENT AND YEAR OF SCHOOL IN WHICH ENROLLED

The data on school enrollment were derived from answers to question 20 (see facsimiles of questionnaire item and instructions, pages App-34 and 38).

This question was asked of all persons in the 15-percent sample and tabulated for persons 3 years old and over. The data on year of school in which enrolled were obtained from responses, for those who were enrolled, to the question on highest grade attended, question 21 (see facsimiles of questionnaire item and instructions, pages App-34 and 38).

Definitions

Schooling included.—Persons were included as enrolled in school if they reported attending a "regular" school or college at any time between February 1, 1970, and the time of enumeration. According to the census definition, "regular" schooling refers to formal education obtained in public and private (denominational or nondenominational) nursery schools, kindergartens, elementary and secondary schools, colleges, universities, or professional schools, whether day or night school, and whether attendance was full time or part time. That is, "regular" schooling is that which may advance a person toward an elementary school certificate or high school diploma, or a college, university, or professional degree. Schooling that was not obtained in a regular school and schooling from a tutor or through correspondence courses were counted only if the credits obtained were regarded as transfer-

able to a school in the regular school system. Persons were included as enrolled in nursery school only if the school included instruction as an important and integral phase of its program. Persons who had been enrolled in a regular school since February 1, 1970, but who had not actually attended, for example because of illness, were counted as enrolled in school.

Schooling excluded.—Persons were excluded from the enrollment figures if the only schools they had been attending at any time since February 1, 1970, were *not* "regular" (unless courses taken at such schools could have been counted for credit at a regular school). Schooling which is generally regarded as *not* "regular" includes that given in nursery schools which simply provide custodial day care, in specialized vocational, trade, or business schools, in on-the-job training, and through correspondence courses.

Level and year of school in which enrolled.—Persons who were enrolled in school were classified according to the level and year of school in which they were enrolled. The levels which are separately identified in this report are nursery school, kindergarten, elementary school, high school, and college. Elementary school, as defined here, includes grades 1 to 8 and high school includes grades 9 to 12. If a person was attending a junior high school, the equivalent in terms of 8 years of elementary school and 4 years of high school was obtained. (See the section on "Years of school completed" for a discussion of variations in school organization.) The term "college" includes junior or community colleges, regular 4-year colleges, and graduate or professional schools.

Public, parochial, or other private school.—Persons who were enrolled in school were also classified as attending a public, parochial, or other private school. In general, a "public" school is defined as any school which is controlled and supported primarily by a local, State, or Federal government agency. A "parochial" school is defined here as a private school which is controlled or supported primarily by a religious organization to provide regular elementary or secondary education. An "other private" school is defined as a nonpublic school controlled or supported primarily by private groups other than religious organizations.

Enumeration of college students.—College students were enumerated in the 1950, 1960, and 1970 censuses where they lived while attending college whereas in most earlier censuses they were enumerated at their parental home.

Comparability

Earlier census data.—The corresponding question on schooling in the 1930 census applied to a somewhat longer period, the period since the preceding September 1. Furthermore, in that census the question was not restricted as to the type of school the person was attending. In 1940 the question referred to the period since the preceding March 1. In 1950 the reference period was changed to that between February 1 (the usual date for beginning the second semester) and the time of enumeration. The same reference period was used in 1960 and 1970.

In 1950, for the first time in a decennial census, kindergarten enrollment was separately identified, but the number of children enrolled in kindergarten was not included with the 1950 statistics on enrollment. In 1960, kindergarten enrollment was separately identified and included with the regular enrollment figures. In 1970, for the first time in a decennial census, nursery school enrollment was separately identified and included with the regular enrollment figures.

The age range for which enrollment data have been obtained has varied for the several censuses. Information on enrollment was recorded for persons of all ages in 1930 and 1940, for persons 5 to 29 years old in 1950, for those 5 to 34 years old in 1960, and for those 3 years old and over in 1970. Most of the published enrollment figures relate, however, to ages 5 to 20 in 1930, 5 to 24 in 1940, 5 to 29 in 1950, 5 to 34 in 1960, and 3 to 34 in 1970. The extended age coverage for the published enrollment data in the recent censuses reflects the increasing number of persons in their late twenties and in their thirties who are attending regular colleges and universities.

Data from other sources.—Data on school enrollment are also collected and published by other Federal, State, and local governmental agencies. This information is generally obtained from reports of school systems and institutions of higher learning and from other surveys and censuses. These data are only roughly comparable with data collected by the Bureau of the Census, however, because of differences in definitions, subject matter covered, time references, and enumeration methods.

YEARS OF SCHOOL COMPLETED

The data on years of school completed were derived from answers to questions 21 and 22 (see facsimiles of questionnaire items and instructions, pages App-34 and 38).

These questions on educational attainment applied only to progress in "regular" schools, as defined above. Both questions were tabulated for all persons 3 years of age and over in the 20-percent sample. In the present report, these data are shown for males 16 to 21 years old not enrolled in school and for all persons 25 years old and over.

Highest grade of school attended.—The first question called for the highest grade attended, regardless of "skipped" or "repeated" grades. In some areas in the United States, the school system formerly had 11 years of school (7 years of elementary school and 4 years of high school) rather than the more conventional 12 years (8 years of elementary school and 4 years of high school, or equivalent years in the elementary-junior high-senior high school system). Persons who had progressed beyond the 7th grade in this type of school system were treated as though they had progressed beyond the 8th grade of elementary school.

Persons whose highest grade of attendance was in a foreign school system, or in an ungraded school whose highest level of schooling was measured by "readers," or whose training was received through a tutor were instructed to report the approximate equivalent grade in the regular United States school system.

Completion of grade.—The second question on educational attainment asked whether or not the highest grade attended had been finished. It was to be answered "Yes" if the person had successfully completed the entire grade or year indicated in response to the previous question. If the person had completed only a half grade or semester, or had dropped out or failed to pass the last grade attended, the question was to be answered "No." If the person was still attending school in that grade, he answered "Now attending."

Comparability

In 1940, a single question was asked on highest grade of school completed. However, respondents frequently reported the grade or year in which they were enrolled, or had last been enrolled, instead of the one completed. The two-question approach used in 1950, 1960, and 1970 was designed to reduce this kind of error.

The number in each category of highest grade of school completed for 1950, 1960, and 1970 represents the combination of (a) persons who reported that they had attended the indicated grade and had finished it, (b) those who had attended the next higher grade but had not finished it, and (c) those still attending the next higher grade.

Median School Years Completed

The median number of school years completed is defined as the value which divides the population group into two equal parts—one-half having completed more schooling and one-half having completed less schooling than the median. This median was computed after the statistics on years of school completed had been converted to a continuous series of numbers (e.g., completion of the 1st year of high school was treated as completion of the 9th year and completion of the 1st year of college as completion of the 13th year). Persons completing a given school year were assumed to be distributed evenly within the interval from .0 to .9 of the year. In fact, at the time of census enumeration, most of the enrolled persons had completed at least three-fourths of a school year beyond the highest grade completed whereas a large majority of persons who were not enrolled had not attended any part of a grade beyond the highest one completed. The effect of the assumption is to place the median for younger persons slightly below, and for older persons slightly above, the true median.

The same procedure for computing this median has been used in the 1940, 1950, 1960, and 1970 censuses. Because of the inexact assumption as to the distribution within an interval, this median is more appropriately used for comparing different groups and the same group at different dates than as an absolute measure of educational attainment.

VOCATIONAL TRAINING

The data on vocational training were derived from answers to question 27 (see facsimiles of questionnaire item and instructions, pages App-35 and 38).

These questions were asked of persons 14 years old and over in the 5-percent sample. Persons were included as having had a vocational training program only if they had completed the program. Included as "vocational training" were formal vocational training programs completed in high school, through an apprenticeship program, in a school of

business, in a nursing school or trade school, in a technical institute, in the Armed Forces, or in Job Corps Training. Excluded from "vocational training" programs were single courses which were not part of an organized program of study, on-the-job training, training in company schools, training by correspondence, and basic training in the Armed Forces. Only persons who had completed a vocational training program were asked to designate their main field of vocational training. Data on the vocational training categories are provided in the Detailed Characteristics reports (PC(1)-D).

In 1970, the question on vocational training was asked of the general population for the first time in a decennial census. Data on vocational training have been collected by the Bureau of the Census through its Current Population Survey and by other Federal, State, and local governmental agencies through reports of training institutions and from other surveys and censuses. These data, like those on school enrollment collected from other sources, are only roughly comparable with data collected in the decennial census.

VETERAN STATUS

The data on veteran status were derived from answers to question 26 (see facsimiles of questionnaire item and instructions, pages App-34 and 38).

These questions were asked of males 14 years old and over in the 15-percent sample. As defined in this report, a "veteran" is a male 16 years old or over who has served but is not now serving in the Armed Forces of the United States. All other civilian males 16 years old and over are classified as nonveterans. The questions on veteran status were asked only of males because relatively few females have served in the Armed Forces of this country. The veteran population is classified according to period of service. The periods of service are the same as 1960 except for the addition of the Vietnam Conflict. Veterans of both the Korean Conflict and World War II are presented as a separate group. All other persons with more than one period of service reported are shown according to the most recent wartime period of service. These data were edited to eliminate reported periods of service which were inconsistent with reported ages.

MARITAL STATUS

The data on marital status were derived from question 8 (see facsimiles of questionnaire item and instructions on page App-33).

This question was asked of all persons. The marital status classification refers to the status at the time of enumeration. Persons classified as "married" consist of those who have been married only once and those who remarried after having been widowed or divorced. Persons reported as separated (either legally separated or otherwise absent from their spouse because of marital discord) are classified as a subcategory of married persons. Persons in common-law marriages are classified as married, and persons whose only marriage had been annulled are classified as never married. All persons reported as never married are shown as "single" in this report. Differences between the number of married males and the number of married females arise from the fact that some husbands and wives have their usual residences in different areas.

MARITAL HISTORY

The data on marital history were derived from answers to question 24 (see facsimiles of questionnaire item and instructions, pages App-34 and 38).

Information on whether married more than once and on age at first marriage have been obtained in each census since 1940. In 1970, the question on how the first marriage ended was included for the first time in a decennial census. For all persons in the 5-percent sample reported as married (including separated), widowed, or divorced at the time of the enumeration, data were obtained on the date of the first marriage. From this information and from current age, data on age at first marriage and years since first marriage were derived. For each person who had been married more than once, information was obtained on the reason for termination of the first marriage. Persons shown as "known to have been widowed" include widowed persons and those currently married or divorced persons whose first marriage ended in widowhood. Persons shown as "known to have been divorced" include divorced persons and those currently married or widowed persons whose first marriage did not end in widowhood.

HOUSEHOLD, GROUP QUARTERS, AND RELATIONSHIP TO HOUSEHOLD HEAD

The data on household relationship and group quarters were derived from answers to question 2 and entries in item B, "Type of unit or quarters" (see facsimiles of questionnaire items and instructions, pages App-33 and 37).

The question on household relationship was asked of all persons. The item on type of unit was filled in the census office for each household.

Household.—A household includes all the persons who occupy a group of rooms or a single room which constitutes a housing unit. A group of rooms or single room is regarded as a housing unit when it is occupied as separate living quarters, that is, when the occupants do not live and eat with any other persons in the structure, and when there is either (1) direct access from the outside of the building or through a common hall or (2) complete kitchen facilities for the exclusive use of the occupants of the household. The average population per household is obtained by dividing the population in households by the number of household heads.

Relationship to head of household.—Five categories of relationship to head of household are recognized in this report. More detailed categories of relationship appear in subsequent reports.

1. *Head of household.*—One person in each household is designated as the "head," that is, the person who is regarded as the head by the members of the household. However, if a married woman living with her husband was reported as the head, her husband was considered the head for the purpose of simplifying the tabulations.

Two types of household head are distinguished—the head of a family and a primary individual. A family head is a household head living with one or more persons related to him by blood, marriage, or adoption. A primary individual is a household head living alone or with nonrelatives only.

2. *Wife of head.*—A woman married to and living with a household head, including women in common-law marriages as well as women in formal marriages. The number of women in this category may not always be the same as the number of "husband-wife households" and the number of "husband-wife families," because of minor differences in the weighting of the data.

3. *Child of head.*—A son, daughter, stepchild, or adopted child of the head of the household of which he is a member, regardless of the child's age or marital status. The category excludes sons-in-law and daughters-in-law. (See definition of "own child" below.)

4. *Other relative of head.*—All persons related to the head of the household by blood, marriage, or adoption but not included in either the category of "wife of head" or "child of head."

5. *Nonrelative of head.*—All persons in the household not related to the head by blood, marriage, or adoption. Roomers, boarders, lodgers, partners, resident employees, wards, and foster children are included in this category.

Group quarters.—All living arrangements other than households are classified by the Bureau of the Census as group quarters. Persons living in group quarters are shown in this report as either "inmate of institution" or "other group quarters" defined as follows:

Inmate.—Persons under care or custody at the time of enumeration in homes, schools, hospitals or wards for juveniles, the physically handicapped, or the mentally handicapped; homes or hospitals for mental, tuberculosis, or other chronic disease patients; homes for unwed mothers; nursing, convalescent, and rest homes; homes for the aged and dependent; and correctional institutions are enumerated as "patient or inmate" of an institution—regardless of their length of stay in that place and regardless of the number of people in the particular place. These persons are all shown in the tabulations as "inmate of institution."

Other group quarters.—A separate living quarters is called a group quarters if there are five or more persons unrelated to the head or, if there is no designated head, six or more unrelated persons in the unit. Places that fall into this category are rooming and boarding houses, communes, workers' dormitories, and convents or monasteries.

Persons residing in certain other types of living arrangements are classified as living in group quarters, regardless of the number or relationship of people in the unit. These include persons residing in military barracks, on ships, in college dormitories, or in sorority and fraternity houses; patients in short-term medical and surgical wards of hospitals who have no usual residence elsewhere; staff members in institutional quarters; and persons enumerated in missions, flophouses, Salvation Army shelters, railroad stations, etc. These people are shown in the tabulations as "in other group quarters."

Certain places and counties have a high proportion of their total population in institutions, colleges, military posts, and other large group quarters. These areas tend to have an unusual age distribution and other characteristics that seriously affect not only birth, marriage, and death rates but also other social and economic characteristics of the residents. Therefore, data on the population in households (which excludes the population in group quarters) are often more useful for such areas than data on the total population. Accordingly, age, race, and sex for persons in households only are shown in table 39 of the PC(1)-B reports for those places and counties with a population of 1,000 or more living in group quarters.

Comparability with earlier census data.—The 1970 definition of a household differs from that used in the 1960 census only in the change in the definition of housing unit to "complete kitchen facilities" now, as compared with "cooking equipment" previously. The definitions for 1970 group quarters are those for 1960 made more specific.

MARRIED COUPLE, FAMILY, AND UNRELATED INDIVIDUAL

Married Couple

In the 1970 census, a married couple is defined as a husband and his wife enumerated as members of the same household. Statistics on married couples were compiled in 1970 only for persons in sample housing units. The number of married couples, as shown in this report, is identical to the number of married men with wife present. By definition, the number of married couples in any area should also be identical to the number of married women with husband present; however, the two figures may not be exactly the same in this report, because the methods used to inflate the sample sometimes gave different weights for husbands than for their wives.

A "married couple with own household" is a married couple in which the husband is a household head; the number of such married couples is the same as the number of "husband-wife families with own household." Conceptually, the number of married couples with own household should also be equal to the number of women classified as wife of head of household, but the two numbers may not be exactly the same because of the method of sample inflation.

Family and Subfamily

According to 1970 census definitions, a family consists of a household head and one or more other persons living in the same household who are related to the head by blood, marriage, or adoption; all persons in a household who are related to the head are regarded as members of his (her) family. A "husband-wife family" is a family in which the head and his wife are enumerated as members of the same household. Not all households contain families, because a household may be composed of a group of unrelated persons or one person living alone. The mean size of family is derived by dividing the number of persons in families by the total number of families.

A subfamily is a married couple with or without children, or one parent with one or more single children under 18 years old, living in a household and related to, but not including, the head of the household or his wife. The most common example of a subfamily is a young married couple sharing the home of the husband's or wife's parents. Members of a subfamily are also included among the members of a family. The number of subfamilies, therefore, is not included in the number of families.

A "family" has the same meaning in the 1970 census as a "primary family" in the 1960 census. Secondary families were defined in the 1960 census as groups of persons related to each other but unrelated to the household head such as lodgers or resident employees. However, the number of such families became so small (95,000 in 1969, according to the Current Population Survey) that the Bureau of the Census decided to include persons in these families in the count of secondary individuals for 1970.

Own Child and Related Child

Statistics on the presence of "own" children are shown in this report for married couples, families, subfamilies, and women of childbearing age. In the 1970 census, as in 1960, a child under 18 years old is defined as an "own" child if he or she is a single (never married) son, daughter, stepchild, or adopted child of a married couple or of a family or subfamily head. In the 1970 census, the term "sons/daughters under 25" is used with the same meaning as "own children under 25" in the 1960 census; these and other similar terms that include persons 18 years old and over relate to all children of the head regardless of marital status. The number of "children living with both parents" includes stepchildren and adopted children as well as sons and daughters born to the couple.

The number of own children under 5 years old shown for women of childbearing age is limited to those living with mothers who have ever been married, whereas the number of own children in families or subfamilies includes those living with parents who have never married. "Related" children in a family include all persons under 18 years old related to the head except wife of head.

Unrelated Individual

An unrelated individual is a member of a household who is not related to anyone else in the household, or a person living in group quarters who is not an inmate of an institution. Unrelated individuals who are not household heads are called "secondary individuals." In the tables on income statistics, unrelated individuals are limited to those 14 years of age or older.

CHILDREN EVER BORN

Definition

The data on children ever born were derived from answers to question 25 (see facsimiles of questionnaire item and instructions, pages App-34 and 38).

In this report the statistics presented on this subject are for women ever married who were in the 20-percent sample. Similar information collected from single women was not included because of anticipated weaknesses in the data and because more complete comparability with previous censuses was achieved thereby. In table showing rates of children ever born to all women, single women have been counted for this report as having no children ever born even though it is known that some of these women have had children. A subsequent report will present national data on fertility that incorporate information for single women.

Although the data on children ever born in this report are for women ever married, the number of children reported undoubtedly includes some illegitimate births. It is likely that some unwed mothers living with an illegitimate child reported themselves as having been married. Also, many of the mothers who married after the birth of an illegitimate child counted that child (as they were expected to do). Respondents were instructed to include children born to the woman before her present marriage, children no longer living, and children away from home, as well as children born to the woman who were still living in the home. On the other hand, the data are, no doubt, less complete for illegitimate than for legitimate births.

In the 1970 census, a terminal category of "12 or more" was used for recording the number of children ever born. For purposes of computing the total number of children ever born, the terminal category was given a mean value of 13.

The wording of the question on children ever born was the same in 1970 as in 1960, except that in 1960 it was asked only of women ever married. Because the present report counts only the children of women ever married, the data should be strictly comparable with those for 1960.

Replacement Index

Some of the tables show a "replacement index" for women 35 to 44 years old. An index of 100 means that the women had borne just enough children for replacement of their generation. An index of 120 means that the women had borne children at a rate that would increase the population by 20-percent per generation.

The replacement index was computed by dividing the number of children ever born per 1,000 women 35 to 44 years old by a national replacement quota of 2,070 and by expressing the result on a per 100 basis. The replacement quota is based on (1) an assumption that the women 35 to 44 years old had completed about 97 percent of their eventual lifetime fertility, (2) the number of births of both sexes needed to yield 1,000 daughters as potential replacements for 1,000 women, and (3) mortality conditions prevailing at the time the women were at the mean age of childbearing (about age 27). More precisely, ratios of gross reproduction rates to net reproduction rates in 1955 to 1960 were used to allow for mortality. Separate quotas by race have not been used because the quota for Negroes is less than one percent higher than that for whites.

WORK DISABILITY

The data on work disability were derived from answers to question 28 (see facsimiles of questionnaire item and instructions, pages App-35 and 38).

Data were obtained for persons 14 through 64 years old in the 5-percent sample but were published for persons 16 to 64 years old. The information was used to identify persons hindered because of a health or physical condition from working at a job. The question refers to a serious illness that has lasted (or is likely to last) for a relatively long time, or a serious physical or mental impairment, defect, or

handicap. Also determined was whether such persons were able to work at all and how long each person had been limited in his working ability.

In 1970, information on work disability was collected for the first time in a decennial census. Other government agencies have collected such statistics but, due to differences in enumeration techniques, the data may not be comparable.

ECONOMIC CHARACTERISTICS

EMPLOYMENT STATUS

The data on employment status were derived from answers to questions 29a, 29b, 30, and 31 (see facsimiles of questionnaire items and instructions, pages App-35 and 38).

The series of questions on employment status were asked of all persons 14 years old and over in the 20-percent sample and were designed to identify, in this sequence: (a) persons who worked at any time during the reference week; (b) persons who did not work during the reference week but who had jobs or businesses from which they were temporarily absent (excluding layoff); (c) persons on layoff; and (d) persons who did not work during the reference week, but who were looking for work during the past four weeks and were available for work during the reference week.

Most of the employment status data shown in this and other 1970 census reports relate to persons 16 years old and over. In 1940, 1950, and 1960, employment status data were presented for persons 14 years old and over. The change in the universe for 1970 was made to achieve conformity with the official measurement of the labor force as revised in January 1967. Selected employment status data, however, are shown for persons 14 and 15 years old.

Reference week.—Data on employment status refer to the calendar week prior to the date on which respondents completed their questionnaires or were interviewed by enumerators. Since the week of enumeration was not the same for all persons, the reference week for employment data is not entirely uniform. For many persons, the reference week for answering the 1970 census employment status questions was the last week in March. Good Friday occurred during this week and time off from work was taken by some workers for this occasion. The effect of this holiday on the 1970 census employment status data varies from area to area depending on the leave practices and time of census enumeration in the area. It is not likely that there was much effect on the overall measurement of employment since employment is based on the work activity during the entire week. The effect of the holiday on the hours worked data should, however, be considered in any interpretation or other use of the data.

Employed.—Employed persons comprise all civilians 16 years old and over who were either (a) "at work"—those who did any work at all as paid employees or in their own business or profession, or on their own farm, or who worked 15 hours or more as unpaid workers on a family farm or in a family business; or (b) were "with a job but not at work"—those who did not work during the reference week but had jobs or businesses from which they were temporarily absent due to illness, bad weather, industrial dispute, vacation, or other personal reasons. Excluded from the employed are persons whose only activity consisted of work around the house or volunteer work for religious, charitable, and similar organizations.

Unemployed.—Persons are classified as unemployed if they were civilians 16 years old and over and: (a) were neither "at work" nor "with a job, but not at work" during the reference week, (b) were looking for work during the past 4 weeks, and (c) were available to accept a job. Examples of job seeking activities are: (1) registering at a public or private employment office, (2) meeting with prospective employers, (3) checking with friends or relatives, (4) placing or answering advertisements, (5) writing letters of application, and (6) being on a union or professional register.

Also included as unemployed are persons who did not work at all during the reference week and were waiting to be called back to a job from which they had been laid off.

Experienced unemployed.—Unemployed persons who have worked at any time in the past are classified as the "experienced unemployed."

Civilian labor force.—The civilian labor force consists of persons classified as employed or unemployed in accordance with the criteria described above.

Experienced civilian labor force.—The "experienced civilian labor force" is comprised of the employed and the experienced unemployed.

Labor force.—The labor force includes all persons classified in the civilian labor force plus members of the Armed Forces (persons on active duty

with the United States Army, Air Force, Navy, Marine Corps, or Coast Guard). "Labor force participation" denotes the number of a particular population group who are in the labor force.

Not in labor force.—All persons who are not classified as members of the labor force are defined as "not in labor force." This category consists mainly of students, housewives, retired workers, seasonal workers enumerated in an "off" season who were not looking for work, inmates of institutions, disabled persons, and persons doing only incidental unpaid family work (less than 15 hours during the reference week). Of these groups, students and inmates are shown separately in selected tables.

Nonworker-worker ratio.—This is the ratio of persons not in the labor force, including persons under 14 years of age, to persons in the labor force.

Problems in classification.—Although the classification of the population by employment status is correct for most regular full-time workers, it is subject to error in marginal cases. In some cases, the complete information needed for accurate classification was not obtained. For example, students or housewives may not have reported themselves as working if they have a job which required only a few hours of work a week.

1950 and 1960 censuses.—The questionnaire items and employment status concepts for the 1970 census differed in many respects from those associated with the 1950 and 1960 censuses. The employment status concepts were revised to conform with the official government concepts of employment and unemployment instituted in January 1967. Specifically, the employment status items for 1970 differed from the series of items asked in the prior censuses in the following ways:

(1) A specific time period—during the past 4 weeks—was added to the "looking for work" question. This was done to introduce an explicit time reference for jobseeking activities. In 1960 and 1950, the "looking for work" item was ambiguous as to the time period for jobseeking activities.

(2) Reference to persons "on layoff" was included in the "temporarily absent from work" question in 1970. In addition, a separate response category of "on layoff" was added to the item. In 1960, reference to persons on layoff was incorporated in the "looking for work" question, and no provision was made in the response categories to distinguish between persons looking for work and those on layoff from a job.

(3) The requirement that a person be currently available for work in order to be counted as unemployed was added for 1970. This change reflects one of the revisions in the official government concepts of employment and unemployment as adopted in 1967.

(4) Also following the official changes in the measurement of employment and unemployment, a revision was made in the employment status classification scheme for 1970. Persons reported as being temporarily absent from job during the reference week were classified as "with a job, but not at work" even if they were looking for work. In 1960, such persons were classified as unemployed.

Other data.—Because the 1970 census employment data were obtained from respondents in households, they differ from statistics based on reports from individual business establishments, farm enterprises, and certain government programs. Persons employed at more than one job are counted only once in the census and are classified according to the job at which they worked the greatest number of hours during the reference week. In statistics based on reports from business and farm establishments, persons who work for more than one establishment may be counted more than once. Moreover, other series, unlike those presented here, may exclude private household workers, unpaid family workers, and self-employed persons, but may include workers less than 16 years of age.

An additional difference in the data arises from the fact that persons who had a job but were not at work are included with the employed in the statistics shown here whereas many of these persons are likely to be excluded from employment figures based on establishment payroll reports. Furthermore, the data in this report include persons on the basis of their place of residence regardless of where they work whereas establishments data report persons at their place of work regardless of where they live. This latter consideration is particularly significant when data are being compared for areas where workers commute between areas.

For a number of reasons, the unemployment figures of the Bureau of the Census are not comparable with published figures on unemployment compensation claims. Generally, persons such as private household workers, agricultural workers, State and local government workers, self-employed,

new workers, and workers whose rights to unemployment benefits have expired, are not eligible for unemployment compensation. Further, many employees of small firms are not covered by unemployment insurance. In addition, the qualifications for drawing unemployment compensation differ from the definition of unemployment used by the Bureau of the Census. Persons working only a few hours during the week and persons classified as "with a job, but not at work" are sometimes eligible for unemployment compensation but are classified as "employed" in the census reports. Differences in the geographical distribution of unemployment data arise because the place where claims are filed may not necessarily be the same as the place of residence of the unemployed worker.

WEEKS WORKED IN 1969

The data on weeks worked in 1969 were derived from answers to question 39 (see facsimiles of questionnaire item and instructions, pages App-36 and 39).

The question was asked of all persons 14 years old and over in the 20-percent sample. In most tables, data are shown for persons 16 years old and over to conform with the universe for employment status data. Data on weeks worked in 1969 for persons 14 and 15 years old are also shown in selected tables.

The data pertain to the number of weeks during 1969 in which a person did any work for pay or profit (including paid vacation and sick leave) or worked without pay on a family farm or in a family business. Weeks of active service in the Armed Forces are also included. It is probable that the number of persons who worked in 1969 and the number of weeks they worked are understated since there is some tendency for respondents to forget intermittent or short periods of employment or to not report weeks worked without pay.

Comparability

The data on weeks worked collected in the 1970 census are comparable with data from the 1960 census but may not be entirely comparable with data from the 1940 and 1950 censuses. In the 1970 and 1960 questionnaires, two separate questions were used to obtain this information. The first identified persons with any work experience during the year and, thus, indicated those persons for whom the questions on number of weeks worked and earned income were applicable. In 1940 and 1950, however, the questionnaires contained only a single question on number of weeks worked.

Median Weeks Worked

The median weeks worked is the value which divides the distribution of persons with work experience into two equal parts—one-half the cases falling below this value and one-half the cases exceeding this value. The median is based on the distribution among the 6 weeks-worked categories of all persons who reported working during the previous year. If the value fell in the terminal category of 50 to 52 weeks, a median of 52 weeks was assigned: if the value fell in the category 13 weeks or less, a median of 10 weeks was assigned. The determination of set medians for these two categories was based on previous experience with the central tendency of the distribution within the categories. Specifically, a median of 52 weeks reflects the predominance of full-year workers and a median of 10 weeks reflects the predominance of students working at summer jobs.

ACTIVITY 5 YEARS AGO

The data on "Activity 5 years ago" were obtained from answers to question 37 (see facsimiles of questionnaire item and instructions, pages App-36 and 39).

The series of questions on activity in April 1965 were asked of all persons 14 years old and over in the 20-percent sample. In 1970, this question was asked for the first time in a decennial census. Data obtained from this question are presented in this report in connection with the subjects "Residence in 1965" and "Labor mobility."

A person was classified as a worker in 1965 if he answered "yes" to either (a) working or (b) in the Armed Forces. All other persons were classified as nonworkers in 1965. Since there were no imputation procedures for nonresponses to this question, the category "nonworkers in 1965" includes persons who failed to answer parts "a" and "b" of the question. Tests have shown that the number of persons who were working in April 1965 is probably understated to some extent since there is a tendency for respondents to forget intermittent or short periods of employment. To minimize this error, published data have been restricted to those age groups with the highest degree of reliability in reporting this information.

Data on labor mobility for males pertain to men who were 30 to 49 years old as of April 1, 1970. The tabulations cover the work status of these men in both 1965 and 1970. The category "worker in 1970" includes

the employed plus members of the Armed Forces; "nonworker in 1970" includes the unemployed and persons not in the labor force. These concepts are defined in the section on Employment Status.

Data for females pertain to women 16 to 44 years old in April 1965, (21 to 49 years old in April 1970). The tabulations concentrate on the working patterns of women in child-bearing years with reference to marital status and the presence and age of children. The definitions of workers and nonworkers in 1965 and 1970 are the same for females as for males.

PLACE OF WORK

The data on place of work were derived from answers to question 29c (see facsimiles of questionnaire item and instructions pages App-35 and 38).

The questions were asked of all persons 14 years old and over in the 15-percent sample who reported working during the reference week. Place of work refers to the geographic location at which civilians and Armed Forces personnel not on leave carried out their occupational or job activities during the reference week. These locations were defined for the purposes of this report by county boundaries or those of county equivalents. Therefore, place of work is classified simply as to whether it was in the same county (or equivalent area) as the worker's county of residence or in a different county. Social and economic characteristics of commuters are presented in the Detailed Characteristics reports (PC(1)-D).

In 1960, place of work was identified only by county and city. In 1970, for the first time, the exact address (number and street name) for the place of work was asked. Persons working at more than one job were asked to report the location of the job at which they worked the greatest number of hours during the reference week. Salesmen, deliverymen, and others who work in several places each week were requested to give the address at which they began work each day, if they reported to a central headquarters. For cases in which daily work was not begun at a central place each day, the person was asked to report the exact address of the place where he worked the most hours last week. If his employer operated in more than one location (such as a grocery store chain or public school system), the exact address of the location or branch where the respondent worked was requested. When the number or street name could not be given, the name of the building or the name of the company for which he worked was to be entered.

MEANS OF TRANSPORATION TO WORK

The data on means of transportation to work were derived from the answers to question 29d (see facsimiles of questionnaire item and instructions, pages App-35 and 38).

The question was asked of all persons 14 years old and over in the 15-percent sample who reported working during the reference week. Means of transportation to work refers to the chief means of travel or type of conveyance used in traveling to and from work on the last day the respondent worked at the address given in question 29c (place of work). The "chief means" referred to the means of transportation covering the greatest distance if more than one means was used in daily travel. "Worked at home" was marked by a person who worked on a farm where he lived or in an office or shop in his home.

In 1960 the means of transportation to work data referred to "last week" rather than the "last day." In the 1960 Chapter C reports, the categories "railroad" and "subway or elevated" were combined, and "taxicab" was included in "other means." In this report, each of these categories is shown separately. Also, in 1970 a distinction was made between the driver and the passenger of the auto.

OCCUPATION, INDUSTRY, AND CLASS OF WORKER

The data on occupation, industry, and class of worker were derived from answers to questions 33, 34, and 35 (see facsimiles of questionnaire items and instructions, pages App-36 and 38).

This series of questions was used to obtain industry, occupation, and class of worker information for the employed, the experienced unemployed, and experienced workers not currently in the labor force. The last two categories apply to persons who had worked at some time during the previous ten years. All three items relate to one specific job held by the person. For an employed person, the information referred to the job held during the reference week. If he was employed at two or more jobs, the job at which he worked the greatest number of hours during the reference week was reported. For experienced unemployed persons and for those not in the labor force, the information referred to the last job that had been held.

This report presents occupation data for both employed and experienced unemployed persons. The indus-

try and class-of-worker figures shown here, however, are limited to employed persons. Industry data for the experienced unemployed and industry and occupation data for experienced workers who were not currently in the labor force but who had worked sometime during the period 1960 to April 1970, are included in the Detailed Characteristics reports (PC(1)-D).

The written occupation and industry descriptions from the questionnaire were converted to identifying codes by relating these descriptions to an entry in the **1970 Census of Population Alphabetical Index of Industries and Occupations**, U.S. Government Printing Office, Washington, D.C., 1971. For the industrial code, however, the first coding attempt was by reference to the **Company Name List**. This list, prepared from the master address list of the 1968 Censuses of Business, Construction, Manufactures, and Minerals, contains the name of the establishment and its Standard Industrial Code converted to its population census equivalent. This listing facilitates coding and helps maintain industrial classification comparability.

The classification systems used to prepare the **Alphabetical Index of Industries and Occupations** for the 1970 census were developed in consultation with many individuals, private organizations, and government agencies. For occupation, the primary consultant was the Interagency Occupational Classification Committee under the auspices of the United States Office of Management and Budget.

Occupation Classification System

The system developed for the 1970 census consists of 441 specific occupation categories arranged into 12 major occupation groups. In this report, selected groupings of the 441 categories are presented. The most detailed comprise 32 occupation groups for the total employed and 22 groups for employed females. Shown below are the component categories of the 32 occupation groups presented in the report. Additional information on the composition of the detailed categories is given in the publication, **1970 Census of Population Classified Index of Industries and Occupations**, U.S. Government Printing Office, Washington, D.C., 1971.

Professional, technical, and kindred workers

Engineers.—Includes aeronautical and astronautical, chemical, civil, electrical and electronic, industrial, mechanical, metallurgical and materials, mining, petroleum, and sales engineers.

Physicians, dentists, and related practitioners.—Includes chiropractors, dentists, optometrists, pharmacists, medical and osteopathic physicians, podiatrists, and veterinarians.

Health workers, except practitioners.—Includes dietitians, registered nurses, therapists, clinical laboratory technologists and technicians, dental hygienists, health record technologists and technicians, radiologic technologists and technicians, and therapy assistants.

Teachers, elementary and secondary schools.—Includes prekindergarten, kindergarten, elementary, and secondary school teachers, but excludes principals and supervisors.

Technicians, except health.—Includes agricultural, biological, chemical, electrical and electronic, and industrial engineering; mathematical, and mechanical engineering technicians; draftsmen; surveyors; airplane pilots; air traffic controllers; embalmers; flight engineers; radio operators; and tool programmers, numerical control.

Other professional workers.—Includes accountants, architects, computer programmers, computer systems analysts, farm management advisors, foresters and conservationists, home management advisors, judges, lawyers, librarians, archivists and curators, actuaries, mathematicians, statisticians, agricultural scientists, atmospherical and space scientists, biological scientists, chemists, geologists, marine scientists, physicists and astronomers, operations and systems researchers and analysts, personnel and labor relations workers, clergymen and other religious workers, economists, political scientists, psychologists, sociologists, urban and regional planners, social workers, recreation workers, teachers except elementary and secondary, vocational and educational counselors, actors, athletes, authors, dancers, designers, editors and reporters, musicians and composers, painters and sculptors, photographers, public relations men and publicity writers, radio and television announcers, and research workers not specifying subject.

Managers and administrators, except farm

Includes assessors, controllers and treasurers in local public administration; bank officers and financial managers; buyers and shippers of farm products; wholesale and retail trade buyers; credit men; funeral directors; health administrators; inspectors in public administration; building mana-

gers and superintendents; ship officers, pilots, and pursers; officials of lodges, societies, and unions; postmasters and mail superintendents; railroad conductors; restaurant, cafeteria, and bar managers; sales managers and retail trade department heads; and school administrators.

Sales workers

Includes advertising agents and salesmen; auctioneers; demonstrators; hucksters and peddlers; insurance agents, brokers, and underwriters; newsboys; real estate agents and brokers; stock and bond salesmen; sales representatives; sales clerks; and salesmen.

Clerical and kindred workers

Bookkeepers.

Secretaries, stenographers, and typists.

Other clerical workers.—Includes bank tellers; billing clerks; cashiers; clerical assistants, social welfare; bill and account collectors; counter clerks, except food; vehicle dispatchers and starters; enumerators and interviewers; clerical estimators and investigators; expediters and production controllers; file clerks; insurance adjusters, examiners and investigators; library attendants; mail carriers and mail handlers; messenger and office boys; utility meter readers; operators of: bookkeeping and billing machines, computer and peripheral equipment, key punch, tabulating machines, and other office machines; payroll and timekeeping clerks; postal clerks; proofreaders; real estate appraisers; receptionists; shipping and receiving clerks; statistical clerks; stock clerks and storekeepers; teacher aides; telegraph messengers; telegraph operators; telephone operators; ticket, station, and express agents; and weighers.

Craftsmen, foremen, and kindred workers[2]

Automobile mechanics, including body repairmen.

Mechanics and repairmen, except auto.—Includes mechanics and repairmen of: air conditioning, heating and refrigeration; aircraft; data processing machines; farm implements; heavy equipment; household appliances; looms; office machines; radios and televisions; and railroad cars.

Machinists.

Metal craftsmen, except mechanics and machinists.—Includes blacksmiths; boilermakers; forgemen and hammermen; heat treaters, annealers, and temperers; job and die setters, metal; millwrights; metal molders; pattern and model makers; rollers and finishers, metal; sheet metal workers and tinsmiths; shipfitters; and tool and die makers.

Carpenters.

Construction craftsmen, except carpenters.—Includes brickmasons and stonemasons; cement and concrete finishers; electricians; excavating, grading, and road machine operators; floor layers; painters, construction and maintenance; paperhangers; plasterers; plumbers and pipe fitters; roofers and slaters; structural metal craftsmen; and tile setters.

Other craftsmen.—Includes automobile accessories installers; bakers; bookbinders; cabinetmakers; carpet installers; compositors and typesetters; cranemen, derrickmen, and hoistmen; decorators and window dressers; dental laboratory technicians; electric power linemen and cablemen; electrotypers and stereotypers; engravers; photoengravers and lithographers; printing pressmen and plate printers; foremen;[3] furniture and wood finishers; furriers; glaziers; log and lumber inspectors, scalers, and graders; inspectors, n.e.c.; jewelers and watchmakers; locomotive engineers and firemen; grain, flour, and feed millers; motion picture projectionists; opticians and lens grinders and polishers; piano and organ tuners and repairmen; power station operators; shoe repairmen; sign painters and letterers; stationary engineers; stone cutters and stone carvers; tailors; telephone installers and repairmen, linemen and splicers; and upholsterers.

Operatives, except transport

Includes asbestos and insulation workers; assemblers; blasters and powdermen; bottling and canning operatives; surveying chainmen, rodmen, and axmen; manufacturing checkers, examiners, and inspectors; clothing ironers and pressers; cutting operatives, n.e.c.; dressmakers and seamstresses, except factory; earth drillers; dry wall installers and lathers; dyers; filers, polishers, sanders, and buffers; furnacemen, smeltermen, and pourers; garage workers and gas station attendants; graders and sorters, manufacturing; produce graders and packers, except factory and farm; metal heaters; laundry and dry cleaning operatives, n.e.c.; meat cutters and butchers; meat wrappers, retail trade;

[2]Craft apprentices are included with their craft.

[3]Foremen who also report a craft occupation are classified with their craft. This category includes foremen of operatives and those who did not report their craft.

metal platers; milliners; mine operatives, n.e.c.; mixing operatives; oilers and greasers, except auto; packers and wrappers, n.e.c.; painters, manufactured articles; photographic process workers; drill press operatives; grinding machine operatives; lathe and milling machine operatives; punch and stamping press operatives; riveters and fasteners; sailors and deckhands; sawyers; sewers and stitchers; shoemaking machine operatives; solderers; stationary firemen; carding, lapping, and combing operatives; knitters, loopers, and toppers; spinners, twisters, and winders; weavers; welders and flame-cutters; winding operatives, n.e.c.; and miscellaneous and not specified operatives.

Transport equipment operatives

Truck drivers.

Other transport equipment operatives.—Includes boatmen and canalmen, bus drivers, urban rail transit conductors and motormen, deliverymen and routemen, fork lift and tow motor operatives, motormen, parking attendants, railroad brakemen, railroad switchmen, taxicab drivers and chauffeurs.

Laborers, except farm

Construction laborers.—Includes laborers in the construction industry and all others who specified helping construction craftsmen.

Freight, stock, and material handlers.—Includes freight and material handlers, garbage collectors, longshoremen, stevedores, and stockhandlers.

Other laborers except farm.—Includes animal caretakers, except farm; fishermen and oystermen; gardeners and groundskeepers, except farm; lumbermen, raftsmen, and woodchoppers; teamsters; vehicle washers and equipment cleaners; warehousemen, n.e.c.; and miscellaneous and not specified laborers.

Farmers and farm managers

Farm laborers and farm foremen

Includes farm foremen; farm laborers, wage workers; farm laborers, unpaid family workers; and self-employed farm service laborers.

Service workers, except private household

Cleaning service workers.—Includes chambermaids and maids, cleaners and charwomen, janitors and sextons.

Food service workers.—Includes bartenders, busboys, cooks, dishwashers, food counter and fountain workers, and waiters.

Health service workers.—Includes nursing and other health aides, health trainees, orderlies and attendants, practical nurses, dental assistants, and lay midwives.

Personal service workers.—Includes airline stewardesses, recreation and amusement attendants, baggage porters, bellhops, barbers, boardinghouse and lodginghouse keepers, bootblacks, child care workers, elevator operators, hairdressers and cosmetologists, housekeepers, school monitors, recreation and amusement ushers, and welfare service aides.

Protective service workers.—Includes firemen (fire protection), guards and watchmen, policemen and detectives, crossing guards and bridge tenders, marshals and constables, sheriffs and bailiffs.

Private household workers

Includes child care workers, cooks, housekeepers, laundresses, and maids and servants.

Four occupation divisions.—The major groups are arranged in four divisions as follows:

White collar.—Professional, technical, and kindred workers; managers and administrators, except farm; sales workers; and clerical and kindred workers.

Blue collar.—Craftsmen and kindred workers; operatives, except transport; transport equipment operatives; and laborers, except farm.

Farm workers.—Farmers and farm managers, farm laborers and farm foremen.

Service workers.—Service workers including private households.

The sequence in which these four divisions appears is not intended to imply that any division has a higher social or skill level than another.

Relation to DOT classification.—The population census occupational classification system is generally comparable with the system used in the *Dictionary of Occupational Titles* (DOT) with the exception of the blue collar workers.[4] The DOT structure for these occupations is quite different from that used by the Bureau of the Census. An important reason for this is that the two systems are designed to meet different needs and to be used

[4] See U.S. Department of Labor, Bureau of Employment Security, Dictionary of Occupational Titles, third edition, Vols. I and II, Washington, 1965.

under different circumstances. The DOT system is basically a job defining scheme and is more detailed than the system used by the Bureau of the Census, which is data collection oriented. Thus, job classification by DOT requires more detailed information than is often found on the census questionnaires.

Industry Classification System

The industry classification system developed for the 1970 Census of Population consists of 226 categories classified into 12 major industry groups. For this report, selected groups of the 226 categories are presented. The most detailed comprise 40 industry groups. Shown below are the component categories of the 40 industry groups defined in Standard Industrial Classification (SIC) terms;[5] i.e., the numbers in parentheses after each of the group titles. In addition, for readers without access to the SIC, descriptive terms of the content of the categories are included as required. Major industry group titles are in italics. Additional information on the industry classification system is presented in the publication, **1970 Census of Population Classified Index of Industries and Occupations**, U.S. Government Printing Office, Washington, D.C., 1971.

Agriculture, forestry, and fisheries (01, 07 (except 0713), 08, 09).

Mining (10-14). Includes quarrying and petroleum and gas extraction as well as mining.

Construction (15-17).

Manufacturing (0713, 19-39).

Furniture, lumber, and wood products (24, 25). Includes logging, sawmills, and furniture manufacturing.

Primary metal industries (33). Includes primary iron, steel, and aluminum furnaces, and rolling and finishing mills.

Fabricated metal industries (including not specified metal) (19, 34).

Machinery, except electrical (35). Includes engines, farm machinery, and office and electronic computing equipment.

Electrical machinery, equipment, and supplies (36).

Motor vehicles and other transportation equipment (37).

Other durable goods (32, 38, 39). Includes stone, clay, glass, and concrete products and professional, photographic, and time keeping equipment.

Food and kindred products (20, 0713). Includes meat, dairy, and grain products; beverage products; and canning and preserving.

Textile mill and other fabricated textile products (22, 23). Includes textiles, carpets, and apparel.

Printing, publishing, and allied industries (27).

Chemical and allied products (28). Includes synthetic fibers, drugs, medicines, and paints.

Other nondurable goods (including not specified manufacturing industries (21, 26, 29, 30, 31). Includes tobacco, paper, petroleum refining, rubber, plastics, and leather products.

Transportation, communications, and other public utilities (40-49).

Railroads and railway express service (40).

Trucking service and warehousing (42).

Other transportation (41, 44, 45, 46, 47). Includes urban transit, bus, water, and air transportation, pipelines and transportation services.

Communications (48). Includes radio, television, telephone, and telegraph communication services.

Utilities and sanitary services (49). Includes electric, gas, water, and sanitary services.

Wholesale and retail trade (50-59).

Wholesale trade (50).

Food, bakery, and dairy stores (54).

Eating and drinking places (58).

General merchandise retailing (53). Includes department stores, variety stores, mail order houses, vending machines, and door to door sales.

Motor vehicle retailing and service stations (55).

Other retail trade (52, 56, 57, 59).

Finance, insurance, and real estate (60-67).

Banking and credit agencies (60, 61).

Insurance, real estate, and other finance (62, 63, 64, 65, 66, 67).

Business and repair services (73-76).

Business services (73). Includes advertising, research labs, employment agencies, consulting services, and computer programing services.

[5] See Executive Office of the President, Bureau of the Budget, **Standard Industrial Classification Manual, 1967.**

Repair services (75, 76). In addition to repair shops, includes automobile rental, parking and washing services.

Personal services (70, 72, 88).

Private households (88).

Other personal services (70, 72). Includes hotels, garment services, beauty, barber, dressmaking, and shoe repair shops.

Entertainment and recreation services (78, 79). Includes theaters, motion pictures, bowling alleys, and billiard parlors.

Professional and related services (80-89).

Hospitals (806).

Health services, except hospitals (80 except 806).

Elementary and secondary schools and colleges (821, 822).

Other education and kindred services (823-829, 84). Includes all other schools (correspondence, etc.), libraries, museums, art galleries, and zoos.

Welfare, religious, and nonprofit membership organizations (86 except part 867).

Legal, engineering, and miscellaneous professional services (81, part 867, 89).

Public administration (9190, 9290, 9390, 9490). Includes postal service and Federal, State, and local public administration.

Relation to Standard Industrial Classification (SIC).—One of the major purposes of the Standard Industrial Classification (SIC) is to promote uniformity and comparability in the presentation of statistical data collected by various agencies. To achieve this goal, the census industry categories are defined in SIC terms. The figures shown in this report differ from those obtained from establishment surveys. One reason for this is that replies from household respondents may differ in detail and nature from those obtained from establishments. Other differences are caused by the geographic differences between residence and place of work, different dates of reference between surveys, and dual job holders that may be counted in the reports of two establishments but counted in the census for only their major job. Readers should also understand the distinction between the census "Public administration" and the SIC "Government". The public administration category covers only regular government functions (SIC code 9X90) whereas the SIC government category includes all government workers with the industrial activity designated in the third and fourth digit of the SIC code. The census covers all government workers in its "class of worker" item.

Relation to certain occupation groups.—Some occupation groups are closely related to certain industries. Transport equipment operatives, the two groups of farm occupations, and private household workers are concentrated in the transportation, agriculture, and private household industries, respectively. The industry categories, however, are broader and include occupations other than those concentrated in that industry. For example, persons employed in agriculture include truck drivers, bookkeepers, and others; persons employed in the transportation industry include mechanics and secretaries; and persons employed in the private household industry include occupations such as chauffeur, gardener, and secretary.

Class of Worker

As noted earlier, each person is classified in three distinct dimensions—occupation, industrial attachment, and class of worker. Thus, placement of a person in a particular class-of-worker category is in most cases independent of the occupation or industry in which he worked. The class-of-worker item on the questionnaire consists of seven categories which are defined as follows:

1. *Private wage and salary workers.*—Persons who worked for a private employer for wages, salary, commission, tips, pay-in-kind, or at piece rates.

2. *Government workers.*—Persons who worked for any governmental unit, regardless of the activity of the particular agency. This category is subdivided by the level of government: (a) Federal, (b) State, and (c) local (county and its political subdivisions such as cities, villages, and townships).

3. *Self-employed workers.*—
   a. Own business not incorporated.—Persons who worked for profit or fees in their own unincorporated business, profession, or trade, or who operated a farm. Included here are the owner-operators of large stores and manufacturing establishments as well as small merchants, independent craftsmen and professional men, farmers, peddlers, and other persons who

conducted enterprises on their own.

b. Own business incorporated.—Persons who consider themselves self-employed but work for corporations. (In most cases the respondents will own or be part of a group that owns controlling interest in the corporation.) Since all workers of a corporation are defined as wage and salary workers, this category is tabulated with "private wage and salary workers," and shown as a subcategory of that group.

4. *Unpaid family workers.*—Persons who worked without pay on a farm or in a business operated by a person to whom they are related by blood or marriage. These are usually the children or the wife of the owner of a business or farm. About one half of the unpaid family workers are farm laborers.

Sample Edit and Allocation Procedures

A factor to be considered in the interpretation of these data is that occasionally respondents returned occupation, industry, or class of worker designations which were not sufficiently specific for precise classification. Many of such cases were corrected through the field editing process and during the coding and tabulation operations. In the coding operation certain types of incomplete entries or errors were corrected using the **Alphabetic Index of Industries and Occupations**. The **Index**, besides providing a code for each occupation or industry, also reflects some restrictions such as occupations that occur only within one industry or for which only one class of worker code is allowed. Also, it is possible in certain situations to assign an industry code based on the occupation reported.

Following the coding operation, there was a computer edit and allocation process. The edit first determined whether a respondent was in the universe which required an occupation and industry code. For those with an incomplete code or one for which no valid category exists (impossible codes), a valid code was assigned. The items (industry, occupation, and class of worker) were then edited for their relation to each other and any inconsistencies were rectified.

If one or more of the occupation, industry, or class of worker items were blank after edit, the respondent was "allocated" to a major group based on sex, age, farm or nonfarm residence, education, and weeks worked. In the presentation of data in this report where only the major group is shown, the allocation cases are included. Where subcategories of the major group are shown, the allocation cases are included in the "other" category for each major group.

Since industry and occupation data from earlier censuses were not allocated, the tables which compare 1970 data with 1960 data show the not reported cases for 1970 as a separate category, rather than allocated to the major groups.

Comparability

Earlier censuses.—Changes have been made in the classification systems for each of the three decennial censuses since 1940 which limit the comparability of the data from one census to another. There are many more categories in the 1970 systems than in the 1960 systems. A new major group "transport equipment operatives" has been added to the occupation classification. The occupations in this major group were formerly part of the operatives major group. There were two other changes in the census, mentioned earlier, that have an important effect on comparability. The first of these is the allocation of the not reported cases, which would increase the size of the major group totals in 1970 relative to 1960. The second is that the official definition for members of the labor force now excludes persons under the age of 16 rather than under the age of 14. The tables in this report showing industry and occupation data for 1960 and 1970 have been adjusted to make the two classifications comparable.

Two additional occupation questions were included on the 1970 census questionnaire. These questions were added to obtain more complete answers from respondents and, therefore, facilitate more accurate coding. This may have some effect on comparability. Moreover, the addition of the category "own business-incorporated" to the class of worker item will affect comparability by decreasing the number of self-employed and increasing the number of private wage and salary workers.

The following publications contain information on the various factors of comparability and are particularly useful for understanding differences in the occupation and industry information from earlier censuses: U.S. Bureau of the Census, Sixteenth Census Reports, Population, **Comparative Occupation Statistics for the United States, 1870 to 1940**; Bureau of the Census Working Paper No. 5, **Occupation Trends in the United States, 1900 to 1950**, 1959; and U.S. Bureau of the Census, **Changes Between the 1950 and 1960 Occupation and Indus-**

try **Classifications—With Detailed Adjustments of 1950 Data to the 1960 Classifications**, Technical Paper No. 18, 1968. In addition, a summary of the changes between the 1960 and 1970 industry classification system may be found in **Statistical Reporter**, Office of Statistical Standards, Office of Management and Budget, April 1969, No. 69-10. Also, a summary of the changes between the 1960 and 1970 occupation classification systems may be found in **Statistical Reporter**, Office of Statistical Policy, Office of Management and Budget, December 1969, No. 70-6.

Other data.—Comparability between the statistics presented in this volume and statistics from other sources is frequently affected by the use of different classification systems, and by many of the factors described in the paragraphs on comparability with other data in the section on "Employment status." In regard to the comparisons between occupation data from the census and data from government licensing agencies, professional associations, trade unions, etc., comparability may not be as direct as would appear. Among the sources of difference may be the inclusion in the organizational listing of persons not in the labor force or persons devoting all or most of their time to another occupation, the inclusion of the same person in two or more different listings, and the fact that relatively few organizations attain complete coverage of membership in a particular occupation field.

INCOME

The data on income were derived from answers to questions 40 and 41 (see facsimiles of questionnaire items and instructions, pages App-36 and 39).

Information on money income received in the calendar year 1969 was requested from all persons 14 years old and over in the 20-percent sample. "Total income" is the algebraic sum of the amounts reported in item 40a (Wage or salary income), item 40b (Nonfarm net self-employment income), item 40c (Farm net self-employment income), item 41a (Social Security or railroad retirement income), item 41b (Public assistance or welfare income), and item 41c (All other income). "Earnings" is the algebraic sum of the amounts reported as wage or salary income and nonfarm and farm net self-employment income. The figures represent the amount of income regularly received before deductions for personal income taxes, Social Security, bond purchases, union dues, medicare deductions, etc.

Receipts from the following sources were not included as income: money received from the sale of property, (unless the recipient was engaged in the business of selling such property); the value of income "in kind" such as food produced and consumed in the home or free living quarters; withdrawal of bank deposits; money borrowed; tax refunds; exchange of money between relatives living in the same household; gifts and lump-sum inheritances, insurance payments, and other types of lump-sum receipts.

Type of Income

Wage or salary income.—This is defined as the total money earnings received for work performed as an employee at any time during the calendar year 1969. It includes wages, salary, pay from Armed Forces, commissions, tips, piece rate payments, and cash bonuses earned.

Nonfarm net self-employment income.—This is defined as net money income (gross receipts minus business expenses) received from a business, professional enterprise, or partnership in which the person was engaged on his own account. Gross receipts include the value of all goods sold and services rendered. Business expenses include cost of goods purchased, rent, heat, light, power, depreciation charges, wages and salaries paid, business taxes (not personal income taxes), etc.

Farm net self-employment income.—This is defined as net money income (gross receipts minus operating expenses) received from the operation of a farm by a person on his own account, as an owner, renter, or sharecropper. Gross receipts include the value of all products sold, governmental subsidies, money received from the rental of farm equipment to others, and incidental receipts from the sale of wood, sand, and gravel, etc. Operating expenses include the cost of fuel, fertilizer, seed, and other farming supplies, cash wages paid to farmhands, depreciation charges, cash rent, interest on farm mortgages, farm building repairs, farm taxes (not Federal, State, and local income taxes), etc. The value of fuel, food, and other farm products used for family living are not included as part of net income.

Social Security or railroad retirement income.—This includes cash receipts of Social Security pensions, survivors' benefits, permanent disability insurance payments, and special benefit payments made by the Social Security Administration (under the National old-age, survivors, disability, and

health insurance programs) before deductions of health insurance premiums. "Medicare" reimbursements are not included. Cash receipts of retirement, disability, and survivors' benefit payments made by the U.S. Government under the Railroad Retirement Act are also included.

Public assistance income.—This includes cash receipts of payments made under the following public assistance programs: aid to families with dependent children, old age assistance, general assistance, aid to the blind, and aid to the permanently and totally disabled. Separate payments received for hospital or other medical care are excluded from this item.

Income from all other sources.—This includes money income received from sources such as interest; dividends; net income (or loss) from property rentals; net receipts from roomers or boarders; veteran's payments; public or private pensions; periodic receipts from insurance policies or annuities; unemployment insurance benefits; workmen's compensation cash benefits; net royalties; periodic payments from estates and trust funds; alimony or child support from persons who are not members of the household; net gambling gains; nonservice scholarships and fellowships; and money received for transportation and/or subsistence by persons participating in special governmental training programs, e.g., under the Manpower Development and Training Act.

Income of families and unrelated individuals.—This report includes information on income of families, unrelated individuals 14 years old and over, and persons 14 years old and over by general characteristics. Statistics on income cross-classified by detailed social and economic characteristics are presented in the Detailed Characteristics reports (PC(1)-D).

In compiling statistics on family income, the incomes of all members 14 years old and over in each family are summed and treated as a single amount. However, in compiling the income data for unrelated individuals and persons 14 years old and over, the total amount of their own income is used. Although the income statistics cover the calendar year 1969, the characteristics of persons and the composition of families refer to the time of enumeration (April 1970). Thus, the income of the family does not include amounts received by persons who were members of the family during all or part of the calendar year 1969 if these persons no longer resided with the family at the time of enumeration. On the other hand, family income amounts reported by related persons who did not reside with the family during 1969 but who were members of the family at the time of enumeration were included. For most families, however, the income reported was received by persons who were members of the family throughout 1969.

Median, Mean, and Per Capita Income

The median income is the amount which divides the distribution into two equal groups, one having incomes above the median and the other having incomes below the median. The median income was generally computed on the basis of the published income intervals shown in each table. However, the median income for 1970 in table 47 was calculated on the basis of the more detailed income intervals presented in table 57. Also, in those cases where no income distribution was published, e.g., families and unrelated individuals combined, the median income was usually computed from income distributions identical to those shown in table 57. For families and unrelated individuals the median income is based on the distribution of the total number of families and unrelated individuals, whereas for persons the medians are based on the distribution of persons 14 years old and over with income. When the median income falls in the terminal category of a distribution, the method of presentation is to show the initial value of the terminal category followed by a plus sign; thus, for example, if the median income falls in the terminal category "$25,000 or more," it is shown as "$25,000+."

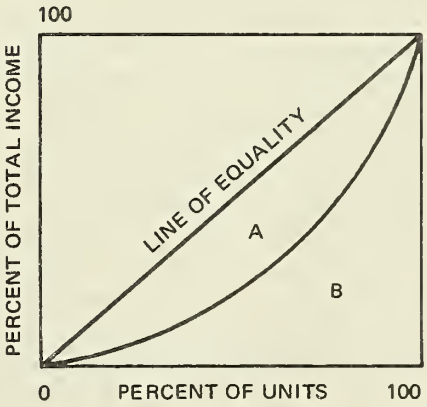
The mean income is the amount obtained by dividing the total income of a particular statistical universe by the number of units in that universe. Thus, mean family income is obtained by dividing total family income by the total number of families. The mean income of each family member is the amount obtained by dividing total family income by the total number of family members. Mean income for persons is obtained by dividing the total income of persons (including patients or inmates in institutional quarters) by the number of persons with income. Per capita income is the mean income computed for every man, woman, and child in a particular group. It is derived by dividing the total income of a particular group by the total population (including patients or inmates in institutional quarters) in that group. For the six income types the means are based on families or unrelated individuals having those types of income. It should be noted that the maximum income

amount that can be aggregated for each family or unrelated individual is 1.3 million dollars for total income and $995,000 for any one type of income. Thus, it is conceivable that the sum of the aggregates of all income types may exceed the aggregate of the total.

Care should be exercised in using and interpreting mean income values in the statistics for small areas or small subgroups of the population. Since the mean is strongly influenced by extreme values in the distribution, it is especially susceptible to the effects of sampling variability, misreporting, and processing errors. The median, which is not affected by extreme values, is, therefore, a better measure than the mean when the population base is small. The mean, nevertheless, is shown in this report for most small areas and small subgoups because, when weighted according to the number of cases, the means can be added to obtain summary measures for areas and groups other than those shown in this report.

Index of Income Concentration

The index of income concentration is a statistical measure derived from the Lorenz Curve. The Lorenz Curve is obtained by plotting the cumulative percent of units (families or unrelated individuals) on the abscissa against the cumulative percent of aggregate income on the ordinate as accounted for by these units. Aggregate income is obtained by multiplying the frequency in each income class interval by an assumed mean for that income class interval. Midpoints were used for income intervals below $15,000. Adjusted mean values were used for the $15,000 to $19,999 interval and the $20,000 to $24,999 interval. In general, the means for the open-end intervals used in computing the index of income concentration for family income distributions ($25,000 or more) and unrelated individual income distributions ($15,000 or more) were obtained by fitting a Pareto curve to the data. When the use of the Pareto formula resulted in what appeared to be an extraneous mean value exceeding $75,000 for families or exceeding $40,000 for unrelated individuals, $36,000 or $23,000, respectively, were used as the means for the open-end intervals in the income distributions for families and for unrelated individuals. If all units had exactly the same relative income, perfect equality would be represented by the diagonal shown in the diagram. Curves drawn to actual data invariably fall below this line and the greater the inequality in the distribution of income, the greater the area between the diagonal line and the Lorenz Curve.



The index of income concentration is defined as the ratio of the area between the diagonal and the Lorenz Curve to the total area under the diagonal. This relationship can be expressed as follows, using the notation in the diagram above.

$$L = \frac{A}{A+B} = \frac{\text{area betw. curve and diagonal}}{\text{area under diagonal}}$$

The index of income concentration ranges from 0.0 to 1.0. As the index approaches the limit of 1.0, the greater will be the inequality of the income distribution. For more detailed information on this measure, see Trends in the Income of Families and Persons in the United States 1947 to 1964, Technical Paper No. 17, published in August 1967 by the Bureau of the Census.

Limitations of the Data

Since questionnaire entries for income are frequently based on memory and not on records, many persons tend to forget minor or irregular sources of income, resulting in the under-reporting of income. In addition, there are errors of reporting due to misunderstanding of the income questions. One type of such error is the reporting of gross instead of net dollar amounts for the two questions on net self-employment income, which results in the overestimation of these items. Another common error is the reporting of identical dollar amounts in two of the six income items where a respondent with only one source of income assumed that the second amount should be entered to represent total income. Such instances of over-reporting would have an impact on the level of mean nonfarm or farm self-employment income and mean total income published for the various geographical subdivisions of the State. Telephone callback procedures were instituted in the coding operation to reduce some of these reporting errors and to improve the accuracy of income data. Moreover, many misreporting errors were rectified through

the coding and the computer editing procedures, resulting in improved consistency of reported income items with work experience, occupation, and class-of-worker information. For example, if a person reported that he was a self-employed (not incorporated) farm worker but had reported wage and salary earnings only, the latter amount was shifted to net farm self-employment income. Another type of problem found involved nonreporting of income data. Where income information was not reported, elaborate editing and allocation procedures were devised to impute appropriate values (either "None" or positive or negative dollar amounts) for the missing entries. These procedures are described in more detail in the section "Accuracy of the Data."

The income tables for families and unrelated individuals include in the lowest income group (less than $1,000) those that were classified as having no 1969 income as defined in the census. Many of these were living on income "in kind," savings, or gifts; were newly created families; or were families in which the sole bread winner had recently died or left the household. However, many of the families and unrelated individuals who reported no income probably had some money income which was not recorded in the census.

The income data in this report cover money income only. The fact that many farm families receive an important part of their income in the form of "free" housing and goods produced and consumed on the farm rather than in money should be taken into consideration in comparing the income of farm and nonfarm residents. It should be noted that nonmoney incomes are also received by some nonfarm residents. They often take the form of business expense accounts, use of business transportation and facilities, or partial compensation by business for medical and educational expenses. Many low income families also receive "income in kind" from public welfare programs. In comparing income data for 1969 with earlier years, it should be noted that an increase or decrease in money income does not necessarily represent a comparable change in real income, unless adjustments for changes in prices are made.

Comparability

Earlier censuses. —The income data collected in the 1940, 1950, and 1960 censuses were basically similar to the 1970 census data, but there were variations in the detail of the questions. In 1960, information on income was obtained from all members comprising every fourth household and every fourth person 14 years old and over living in group quarters. Each person was required to report (a) wage or salary income (b) net self-employment income and (c) income other than earnings received in 1959. Between the 1960 and 1970 censuses, there were also changes in the processing of the data. In the 1960 census, an assumption was made in the editing process that no other type of income was received by a person who had reported the receipts of either wage and salary income or self-employment income but who had failed to report the receipt of other money income. This person was considered as unallocated. In the 1970 census, this assumption was not made. Generally, all missing values were imputed either as "none" or a dollar amount. If a person reported a dollar amount in either (a) wage or salary income, (b) net nonfarm self-employment income, or (c) net farm self-employment income, he was designated as unallocated only if no further dollar amounts were inputed for any additional missing entries. Moreover, there was a difference in the method of computer derivation of aggregate income from individual amounts that were rounded to tens, hundreds, and thousands in the coding operation. In the 1960 census processing, $5, $50, and $500, respectively, were added by the computer to the absolute value of each amount that was coded in tens, hundreds, or thousands of dollars. Entries of $25,000 or more or losses of $9,900 or more were treated as $50,000 and minus $10,500, respectively. In the 1970 census, income amounts were coded in either hundreds or tens of thousands of dollars; $50 was added by the computer to each amount coded in hundreds of dollars and $5,000 to each amount coded in tens of thousands of dollars. Entries of $990,000 or more or losses of $9,900 or more were treated as $995,000 and minus $9,950, respectively, in all computer derivations of income aggregates. The coding schemes used in both the 1960 and 1970 censuses were developed to accomodate space limitations on the questionnaires.

In both the 1960 and 1970 censuses, all nonrespondents on income (whether heads of families or other persons) were assigned the reported income of persons with similar characteristics, as described in Appendix C, "Accuracy of the Data."

In 1950, information on income was obtained from every fifth person 14 years old and over. If the sample person was the head of the family, the income questions were repeated for the other family members as a group in order to obtain the income of the whole family. In tabulating family
